(PART-I)1. CHAPTER-IPRELIMINARY & DEFINITIONS1.1. Authority

- 1.1.1. In exercise of the powers vested in the Executive Board under Article 23 of the Presidential Order No. 7 of 1980 and all other enabling powers in that behalf, the Executive Board hereby makes the following By-Laws for carrying out the additions to, or alterations in, or demolition of the existing buildings, or erection or re-erection of new buildings and town planning parameters to be followed in DHAQ Authorities (DHAQ).
- 1.1.2. These By-Laws are hereby promulgated and published and will be implemented in full spirit under the title of: "DHA Quetta Town Planning and Building Control Regulations 2024".
- 1.1.3. These By-Laws are hereby promulgated under short title of: "DHAQ TPBC Regulations 2024".
- 1.1.4. These Regulations shall extend to the Specified as well as Notified area of the Defence Housing Authority Quetta.
- 1.1.5. The DHA Quetta is competent and has the power to amend these Regulations from time to time as it may deem necessary. The term amendment covers addition, deletion, substitution and modification of these Regulations.
- 1.1.6. Administrator DHA Quetta may direct the concerned officer (under whose jurisdiction violations have occurred) to take action under these Regulations concerning any violation.

1.2. Definitions

In this regulation and in the subsidiary instructions that may be issued from time to time, frequently referred terms have the meanings as indicated. Where any term is not defined, it shall have ordinary meanings or such as the context may apply.

- 1.2.1. **Act and Regulation** shall mean **DHA Quetta Act 2016** and 'Regulations' means regulations made under these Acts.
- 1.2.2. **Addition / Alteration / Revision** in the Plan shall mean any change, amendment, modification, revision, or alteration in the existing building or the approved building plan.
- 1.2.3. **Amenity Plot** shall mean the plots demarcated and assigned exclusively for the purpose of amenity facilities, including, inter alia, government offices, health, welfare, education, worship places, burial grounds, parking and recreational areas.
- 1.2.4. **Amalgamation** shall mean the joining, amalgamation and merger of two or more adjoining plots into a single plot in accordance with these Byelaws.
- 1.2.5. **Ancillary Building** shall mean a building supplementary/subservient to the principle building on the same plot e.g., servant quarters, garages and guard room etc.
- 1.2.6. **Apartment** shall mean an independent residential unit, in a building, consisting of at least one bedroom, a living room, a bathroom, a kitchenette and a store.
- 1.2.7. **Approved Plans** shall mean plans for a building or a layout plan approved by the Authority in accordance with these Regulations.

- 1.2.8. Architect** shall mean a person registered with the Pakistan Council of Architects and Town Planners (PCATP) as an Architect.
- 1.2.9. Architectural Plan** shall mean a plan showing the arrangements of proposed buildingworks, including floor plans, elevations and sections, in accordance with the requirements of these Regulations.
- 1.2.10. Arcade** shall mean a covered walk-way or a verandah between the shops and the road or street on which the shops abut.
- 1.2.11. Area** shall mean the area under the jurisdiction of the DHA Quetta and/or the area shown in the Master Plan of DHA Quetta and including any extension or modification affected therein from time to time.
- 1.2.12. Attached Building** A building which is joined to another building on one or more sides.
- 1.2.13. Authority** shall mean the DHA Quetta.
- 1.2.14. Balcony** shall mean an outside projection from a building overlooking a compound, road or courtyard and projecting in front of a room and not used for sitting purposes.
- 1.2.15. Basement** shall mean a structure wholly or partly below natural ground level/approach road level.
- 1.2.16. Building / House Line** shall mean a line beyond which the outer faces of any building except boundary wall, porch and projection may not extend.
- 1.2.17. Building Works** shall mean site excavation, erection or re-erection of a building or making addition/alterations to an existing building.
- 1.2.18. Building Plan** shall mean a plan showing detailed arrangements for an intended building to be constructed on the allotted plot/ within the property line.
- 1.2.19. Business Zone** A zone dedicated for commercial activities. Business Zone is expected to be the hub for all business, commercial, office, retail, residential, leisure and recreational activities.
- 1.2.20. Byelaws** shall mean the laws and regulations approved by the Executive Board / Competent Authority of **DHA Quetta.**
- 1.2.21. Carpet Area** shall mean the net floor area within a habitable, rent-able or saleable unit excluding the area of peripheral walls but including the area of internal walls and columns.
- 1.2.22. Car Porch** A shelter or a shed for a car/ vehicle, which is permanently open on at least two sides.
- 1.2.23. Cardinal Points:** means the directions of North, South, East and West as marked on the block/building plan.
- 1.2.24. Clients Facilitation Center (CFC)** To facilitate clients in the design process, construction work and obtaining utility connections a Clients Facilitation Center (CFC) is established in the DHA, Quetta Head Office, Quetta. One Window Operation exists for facilitation. (Will establish in later time frame).
- 1.2.25. Corner plot** shall mean a plot situated at the intersection of two vehicular streets and will have a chamfer as per regulation.
- 1.2.26. Commercial Area** shall mean the area designated for establishment and operations of commercial activity, including, inter alia, shops, show-rooms, stores / go-downs, ware-houses, other market centres, hotels, clubs, petrol and gas filling stations etc.
- 1.2.27. Commercial Building** shall mean a designated for commercial purposes, and includes, inter alia, shops, show

rooms, offices, hotels, restaurants and/or apartments.

- 1.2.28. Competent Authority** Means President / Vice President, Administrator of DHA or a concerned officer empowered by the Authority to approve the plans and to control building activity.
- 1.2.29. Completion Plan** An "As Built Plan" submitted to the DHA, Quetta for the purposes of obtaining approval and occupancy certificate.
- 1.2.30. Compulsory Open Space (COS)/ Setback:** Minimum part of a plot, which is to be left completely and compulsorily open to the sky under the Regulations, over which no structure or any integral part of the building will be permitted.
- 1.2.31. Contractor** shall mean a person or firm that undertakes a contract to provide materials or labor to perform a service or do a job.
- 1.2.32. Covered Area** shall mean (for the purpose of determining the floor area) the sum of the gross horizontal areas of the floor/floors, including, verandas, 25 percent of the area covered by pergolas but excluding shades/projections (not exceeding the maximum permissible limits).
- 1.2.33. Design Wing** Means office of the DHA Quetta where designing & structural services are available.
- 1.2.34. Detached Building** Building not joined to other building on any side.
- 1.2.35. DHA** Defence Housing Authority
- 1.2.36. Duplex:** Two identical residential housing units existing under the same roof with a common wall dividing the first unit from the other at all levels with separate entrances/ gates.
- 1.2.37. Efficient Energy Use** To reduce the amount of energy required to provide products and services.
- 1.2.38. Encroachment** shall mean an unauthorized intrusion onto a neighboring property (including DHA Quetta property) through the creation or extension of a physical structure (including flora) above or below the surface of the land.
- 1.2.39. Engineer** A person currently registered with Pakistan Engineering Council (PEC) as an engineer.
- 1.2.40. Erection of Building:** Construction of building in defined premises/ boundaries, which may include the structural alterations for making any additions to an existing building.
- 1.2.41. Ekistics:** A science with human settlements including regional, city, community planning and dwelling design. The study involves every kind of human settlement with particular attention to geography, ecology, human psychology, anthropology, culture, politics and occasionally aesthetics. Drawing on the research and experience of professionals in various fields such as architecture, engineering, city planning and sociology.

- 1.2.43. External Wall** Any outer wall of a building abutting on an external or internal open space on adjoining property lines.
- 1.2.44. Extra Land** shall mean any piece of land that has been left vacant adjacent to any plots would be the

property of DHA Quetta which reserves the right to allot it to any member on payment or keep it for its own use.

- 1.2.45. Flats** shall mean block(s) of buildings consisting of a number of residential units built horizontally or vertically exclusively designed for human habitation in the Residential / Commercial Area.
- 1.2.46. Floor Area Ratio (FAR)** shall mean the total covered area of a building or buildings on a plot divided by the total area of that plot.
- 1.2.47. Footprint** shall mean the portion of a plot of land covered at any level by a building or part other than the basement.
- 1.2.48. Form** Form appended to these Regulations.
- 1.2.49. Foundation** shall mean an RCC structure designed to bear and distribute the load of the building into the ground through RCC columns, pillars, beams or walls.
- 1.2.50. Frontage of Corner Plot** shall mean the frontage of plots opening on more than one road will be with reference to the street no as per the possession/site plan.
- 1.2.51. Front Elevation** Exterior facade of building, facing the main street.
- 1.2.52. Gallery** An open or covered walkway or a long passage.
- 1.2.53. Grey water** It is all wastewater generated in households or office buildings from streams without faecal contamination, i.e., all streams except for the wastewater from toilets.
- 1.2.54. Grease Trap** A plumbing device (a type of trap) designed to intercept Mandatory Open Spaces, greases and solids before they enter a waste disposal system. Such traps are also known as grease inceptor, grease recovery device, grease capsule and grease converter.
- 1.2.55. Green Roof** The development / creation of vegetated space integrated structurally on top of a man-made structure. Commonly known as Roof Garden.
- 1.2.56. Half Bath** A bathroom is a room for personal hygiene activities generally containing at minimum a toilet and sink.
- 1.2.57. Handicap** A mental or physical disadvantage, such as blindness or a missing leg or a body part etc. that disables a person in some way
- 1.2.58. Head Room:** The clear vertical distance measured between the finished lower level and the underside of lowest obstruction such as ceiling or rafter, whichever is lower.
- 1.2.59. Height of Building** shall be taken as the vertical measurement from the crown of the front approach road to the highest part of the building.
- 1.2.60. Height of a Room** The vertical distance measured between the finished floor level and under side of the ceiling.
- 1.2.61. House or Bungalow** An independent residential unit for the use of people, a family having at least one habitable room, bedroom, kitchen and bath/ toilet.
- 1.2.62. HVAC (Heating, Ventilating, and Air-Conditioning)** It is the technology of indoor and vehicular

environmental comfort. Its goal is to provide thermal comfort and acceptable indoor air quality.

- 1.2.63. Industrial Building** A building constructed on a plot allotted exclusively for the purpose under these Regulations.
- 1.2.64. Inter Floor** A floor provided between two main floors of the building.
- 1.2.65. LED (Light Emitting Diode)** A two lead semiconductor light source.
- 1.2.66. License** Permission granted by the DHA, Quetta to perform such functions as allowed under these Regulations
- 1.2.67. Licensee** An individual/ firm holding authorized license to work in DHA, Quetta.
- 1.2.68. Light Industries** Building(s) providing work place free from any obnoxious industries / trade such as chemicals, explosives, noise producing and smoke/smell emitting industries, etc.
- 1.2.69. Light Reflectance Value (LRV)** It is a measure of visible usable light that is reflected from a surface when illuminated by a light source.
- 1.2.70. Loft** A space just below the roof of a building that is used for storage purpose i.e. horizontal slab.
- 1.2.71. Local Development Plan** means plan for any specific area for specific type of urban development for which specific Building and Zoning Regulations may be prepared and notified by the Authority.
- 1.2.72. Master Plan** shall mean the plan showing the layout of the area with a schedule and supported by a written statement of goals and objectives and financial implications.
- 1.2.73. Mezzanine** Any floor inter-posed between ground and first floor of a building and having headroom not less than 6'-0" and not more than 7'-0".
- 1.2.74. Mumty** shall mean a structure with a covering roof over a primary (main) or secondary staircase and its landing built to enclose the stairs to protect from weather.
- 1.2.75. Mixed-use Zone** A zone dedicated having mixed-use buildings with specific number of floors allocated to each building type as per the Master plan.
- 1.2.76. Masonry** Stone, bricks or cement concrete blocks laid in lime, cement or mud mortar.
- 1.2.77. Marla** 1 Marla will be equal to 225 Sft.
- 1.2.78. Mega Project** The project of multiple land use/multi story buildings predominantly of commercial use with plot area more than 30 kanal
- 1.2.79. NDC** means No Demand Certificate.
- 1.2.80. NOC** means No Objection Certificate.
- 1.2.81. Non-Conforming Use** The use of a plot or structure for purpose other than authorized.
- 1.2.82. Non-Standard Plot** means a plot created due to adjustment in town planning or re-planning of area having irregular shape, dimensions and size, different than adjoining rectangular plots.
- 1.2.83. Nuisance.** Includes any act, omission, place or thing which causes or is likely to cause injury, danger, annoyance or offence to the sense of sight, smell or hearing or which is or may be dangerous to life, health or property.
- 1.2.84. Obnoxious Industries / Trade** It includes, amongst others, bricks kilns, coke ovens, salt glazing, Sulphur working, making of cellulose lacquer, pitch bitumen, charcoal burning, gut scraping, tannery, glue making,

fish meal, soap boiling, tallow making, skin dyeing and those which may be specified as Obnoxious by the Industries Department from time to time.

- 1.2.85. Open Stairs Case** shall mean a staircase whose roof must be fully open to the sky or without an RCC roof and of which at least two sides must be fully open and clear of any adjoining walls of any other building.
- 1.2.86. Owner** A person registered as member in DHA holding title to a piece of land with or without construction thereupon.
- 1.2.87. Parapet** shall mean a wall, whether plain, perforated or paneled, protecting the edge of a roof, balcony, veranda or terrace.
- 1.2.88. Park** A recreational area, developed as such having greenery i.e., Plantation/ grass which may include all or any of the following facilities.
- 1.2.89.** Jogging track/Walk-ways.
- 1.2.90.** Water features like lakes, fountains, gushers etc.
- 1.2.91.** Restaurants, cafeterias or food stalls.
- 1.2.92.** Aviary.
- 1.2.93.** Tube wells.
- 1.2.94.** Public toilets
- 1.2.95.** Lawn / Green land.
- 1.2.96.** Play land.
- 1.2.97.** Any other outdoor / covered recreational facility.
- 1.2.98. Pergola** shall mean a structure whose roof must be at least 75 percent open to the sky.
- 1.2.99. Playground** An area used for outdoor play or recreation, especially by children, and often containing recreational equipment such as slides and swings.
- 1.2.100. Plinth** shall mean the height of the finished floor level of the ground floor, measured from the top of the finished surface of the road serving the plot, taken from the centre of the property line of the plot along the road. In case of more than one road serving the plot, the plinth will be measured from the reference road providing principal access.
- 1.2.101. Plot Title** Title of the plot will be considered with reference to the road mentioned in the allotment/transfer letter.
- 1.2.102. Possession** shall mean handing over a demarcated plot to the member with the demarcation of four corners.
- 1.2.103. Projection** shall mean an outer side projection from the building line to give protection from weather and sun.
- 1.2.104. Property Line** shall mean the boundary line of the plot which separates the private property from the public property or private property from another private property.
- 1.2.105. Public Buildings** shall mean a building designed for public use such as a hospital/dispensary, post office, police station, town hall, library, recreational buildings, club etc.
- 1.2.106. Registered Architect** shall mean a person registered with the Pakistan Council of Architects and Town

Planners (PCATP) and on the panel of DHA Quetta.

- 1.2.107. Registered Engineer** shall mean a person registered with the Pakistan Engineering Council (PEC) and on the panel of DHA Quetta.
- 1.2.108. Registered Proof Engineer** A Professional Engineer duly licensed by The Pakistan Engineering Council (PEC) as Consulting Engineer (Structural Design) and with minimum of 10 years' experience of structural design of building works and whose name is listed on the panel of proof engineers maintained by DHA, Quetta.
- 1.2.109. Registered Geo-Technology Consultant** A Professional Engineer or a firm duly Licensed by Pakistan Engineering Council (PEC) with minimum 5 years' experience as Geo-Tech Engineer and is on the approved panel of geo-tech consultants maintained by the DHA Quetta.
- 1.2.110. Registered Structural Engineer** A Professional Engineer or a firm duly licensed by the Pakistan Engineering Council (PEC) with minimum 5 years' experience as Structural engineers and is on the approved panel of DHA, Quetta.
- 1.2.111. Registered Town Planner** A qualified person or a firm duly registered with Pakistan Council of Architects and Town Planners (PCATP) as an Architect/ Architectural Firm with minimum 5 years' experience as Town Planner and is on the approved panel of DHA, Quetta.
- 1.2.112. Renewable Energy** It is generally defined as energy that is collected from resources, which are naturally replenished, on a human timescale, such as sunlight, wind, waves, and geothermal energy etc.
- 1.2.113. Repair or Renovation** Repair work to services, painting, whitewashing, plastering, flooring, paving, replacement of roof of corrugated sheets or of T-iron or girders or wooden roof without change in the cubical capacity or structure approved by the DHA, Quetta.
- 1.2.114. Residential Building** shall mean a building authorized for residential occupancy by one or more families.
- 1.2.115. Residential Plot** shall mean a plot allotted exclusively for residential purposes.
- 1.2.116. Revised or Amended Plan** Previously approved drawings or plans re-submitted for approval with amendments in accordance with the provision of these Regulations.
- 1.2.117. Roof Top of Commercial Building** Roof of highest or top Mandatory Open Spaces: t stair tower, solar energy system, lift etc. and is shared by all inmates of the building.
- 1.2.118. Scrutiny Fee** A fee to be determined and levied in pursuance of provisions of these Regulations by DHA, Quetta.
- 1.2.119. Sector Shops / Convenient Stores** shall mean a row of shops in a residential area for routine utility requirements.
- 1.2.120. Services** shall mean the public services which are required in a housing scheme to facilitate the health and convenience of the population and include the system of road network, water supply, sewerage, drainage, street lighting, telephone, refuse collection and fire protection.
- 1.2.121. Septic Tank** A tank in which sewage is collected and decomposed, before its discharge into the public sewer or soakage pit.
- 1.2.122. Shop** It includes any room or part of a building used, completely or mainly, for the purpose of trade or

business but will not be used for any activity as may cause noise and nuisance in the neighborhood.

- 1.2.123. Shop-Cum-Flats** shall mean the provision of shops on the ground floor and flats/offices on the subsequent floors in a commercial area.
- 1.2.124. Soakage Pit** shall mean a pit filled with aggregate, boulders or broken bricks and intended for the reception of wastewater or effluent discharged from a Septic Tank.
- 1.2.125. Solar Reflectance Index (SRI)** It is a measure of the solar reflectance and emissivity of materials that can be used as an indicator of how hot they are likely to become when solar radiation is incident on their surface.
- 1.2.126. Special Projects** Land allotted/ sold/ allocated for a special purpose under an agreement duly approved by the Competent Authority or Executive Board of, falls in the category of special projects
- 1.2.127. Stores / Go-downs** shall mean a building/buildings meant for storage of material. Those goods are not of inflammable or objectionable character.
- 1.2.128. Storey** shall mean the space between the floor and the ceiling of a building.
- 1.2.129. Structural Changes** Any change in the structure of a building i.e., supporting members of a building such as load bearing walls, columns, beams, slabs etc.
- 1.2.130. Sub-Division** The division of plot or land held under the same ownership into two or more plots.
- 1.2.131. Sub-Division Plan** A layout plan depicting proposed sub-division duly approved by the DHA, Quetta as provided in these Regulations.
- 1.2.132. Sunshade** An un-habitable outside projection from a building at lintel level to provide protection from weather.
- 1.2.133. Sustainability** Sustainable development is a process for meeting human development goal while sustaining the ability of natural systems to continue to provide the natural resources and ecosystem services upon which the economy and society depends.
- 1.2.134. Sustainable Elements** A plan for an area providing short terms and long-term policy guidelines for a systematic and controlled growth for Business & Commercial activities including the façade and architectural elevations of the buildings.
- 1.2.135. SOP's "SMART BYLAWS & PROCEDURES (for operations, designing, execution and monitoring of buildings) 2022"**.
- 1.2.136. Structural Alteration** Shall mean any change in the structure of a building i.e. supporting members of a building such as the load-bearing walls, columns, beams, slabs etc.
- 1.2.137. Structure Engineer** shall mean a person registered with the Pakistan Engineering Council (PEC) having minimum qualification of MSc Structures and on the panel of DHA Quetta.
- 1.2.138. Trapped Land** shall mean land which is not accessible/approachable by the Authority.
- 1.2.139. Temporary Structure** A structure constructed on temporary basis, within the plot with the approval of DHA, Quetta for a specific period, which will be demolished within approved period, i.e., Temporary structure includes precast slabs, CGI sheets, wooden and any other temporary material.
- 1.2.140. Thermal Bridge** An object (frequently a building) which has a significantly higher heat transfer than the

surrounding materials resulting in an overall reduction in thermal insulation of the object or building.

1.2.141. Thermal Insulation It is the reduction of heat transfer (the transfer of thermal energy between objects of differing temperature) between objects in thermal contact or in range of radioactive influence.

1.2.142. Thermal Transmittance It is the rate of transfer of heat (in watts) through one square meter of a structure divided by the difference in temperature across the structure.

1.2.143. Title of Plot Title of the plot will be considered with reference to the road/ street mentioned in the allotment/transfer letter.

1.2.144. Toilet A fixture that consists usually of a water-flushed bowl and seat and is used for defecation and urination.

1.2.145. Total Floor Area The-sum of the floor areas of all the floors of all the buildings on a plot, less exemption as permitted in these Regulations.

1.2.146. Town Planner A person or a firm currently registered as such with the Pakistan Council of Architects and Town Planners (PCATP).

1.2.147. TP&BC DTE Town planning & Building Control Directorate of DHA, Quetta.

1.2.148. Underground Overhead Water Tank shall mean a tank in which sewage is collected and decomposed before its discharge into a public sewer or Soakage Pit.

1.2.149. Urban Heat Island (UHI) A city or metropolitan area is significantly warmer than its surrounding rural areas due to human activities.

1.2.150. Ware House A building in which goods are stored.

1.2.151. Zone The area earmarked for a particular purpose.

1.3. Application of Byelaws

1.3.1. Every person who, within the limits of DHA, intends to do business, sell any property, erects or re-erects a building, or carry out addition or alteration to an existing building or demolish the existing building or to have residence shall comply with the requirement of these Byelaws.

1.3.2. A building plan shall be approved only for the specified purpose of the plot mentioned in the allotment letter.

1.4. Exemptions

1.4.1. Application of these Byelaws may be relaxed by the Competent Authority, in its sole discretion, provided there is sound justification from engineering, town planning, Building Control and all other relevant aspects.

1.5. Interpretation of Byelaws

1.5.1. In case of any ambiguity in the interpretation of any Byelaws, DHA Quetta reserves the right to deliver/implement the interpreted contents of such Byelaws.

2. CHAPTER-II**TRANSFER & RECORD DIRECTORATE****2.1. Over Size Plot.**

2.1.1. Transfer and Record Directorate regulate the over size of plot. Variation in plot size more than 225 Sq fts is adjusted as per Category A (constructable land). Revised allotment letters are required to be issued.

2.2. Extra Land.

2.2.1. After approval of Extra Land Transfer and Record Directorate issue the revise allotment letters after deposit of extra land charges including Advance Tax u/s 236 (k), 1% filer and 2% non-filer, as intimated by Finance Directorate for Category A (constructable land), extra land allotted under Category B and C for utilization as green area. Allotment of extra land is exclusively for green area with house. Extra land will be retrieved on sale of plot. In case of withdrawal of extra land, actual payment made in this regard will be reimbursed to the member. However, on allotment of Category B land allotment letter will also be revised. In case of Category C, there is a need to get revised allotment letter.

2.3. Amalgamation of Plot.

2.3.1. As per Byelaws with specific permission, adjacent plots/land may be combined together to form a single unit upto maximum of 4 kanals (residential) including extra land provided entire piece of land has single ownership. Responsibility for initiation/approval of case and intimation to member and Transfer and Record Directorate stays with Town Planning and Building Control Directorate. After deposit of amalgamation fee including other due charges as intimated by Town Planning and Building Control Directorate member will deposit original allotment letter along with updated account statement for issuance of revised allotment letter of the Plot.

2.4. De-amalgamation of Plot.

2.4.1. De-amalgamation of amalgamated res plots are permitted subj to submission of payment of applicable dues, on member's request as per DHA policy. However, such plots when constructed will not be sub-divided unless complete building is dismantled. Such amalgamated plots/ land including green area will be governed by applicable DHA building Byelaws.

2.5. Inspection of Completed Units (Residential and Commercial) Prior to Transfer.

2.5.1. Completion Certificate of constructed units (residential and commercial) will be verified from Town planning & Building Control Directorate prior to transfer of said constructed unit to identify building Byelaws violation and clearance of all utility bills from Administration Directorate. The violation (if any) shall be rectified by the seller and purchaser will give all required undertakings as new owner (Anx A, B & C) prior to transfer of constructed unit.

- 4.1.11. Night stay in rented premises shall not be allowed except for security staff etc.
- 4.1.12. Placing LPG cylinders in open spaces is strictly prohibited. No structural changes will be made to the main building structure.
- 4.1.13. For businesses inside parks, no parking is allowed on residential streets. Any complaints by residents will be taken seriously and penalties will be awarded.
- 4.1.14. Penalties. As per DHA's applicable charges/policy mentioned in **Chapter XV**.

5. CHAPTER-V **MARKETING DIRECTORATE**

5.1. Hoardings

- 5.1.1. The content of the display has to be approved by DHA beforehand and payment of fee as prescribed by the Authority from time to time.
- 5.1.2. Fixing arrangements like hooks etc should be planned adequately.
- 5.1.3. On the facade of a shop, a 2 ft wide space be provided to fix hoardings.
- 5.1.4. The electrical & structural responsibility of neon signs shall be of the owner.
- 5.1.5. The name of the owner, mobile number and address have to be displayed on the side of his / her hoarding.
- 5.1.6. Any hoarding at any time can be dismantled by DHA.
- 5.1.7. Wall chalking, writing on walls and pasting of posters etc on the walls shall not be allowed and perpetrators shall be fined as per DHA policy.

5.2. Commercial Signage

- 5.2.1. Width – Complete front face of the shop.
- 5.2.2. Depth – Standard 1 ft.
- 5.2.3. Height – Upto 3 ft.
- 5.2.4. A corner shop with an exterior side face shall be allowed signage over the window width with a height not exceeding 5 ft.
- 5.2.5. Placement of any other Temporary / Permanent materials outside the shopping cent`re is strictly prohibited.
- 5.2.6. Placement of irregular-size displays/signboards at the specified and unauthorized locations will not be allowed.
- 5.2.7. Placement of advertising boards on the side wall of the commercial plaza will not be allowed.
- 5.2.8. Directional signage will not be allowed without permission.
- 5.2.9. Unauthorized use of circulation spaces will not be allowed.
- 5.2.10. The safety of the signboard to avoid any incident/injury to any visitor will be the sole responsibility of the owner/member.

(PART-II)**6. CHAPTER-VI****TOWN PLANNING AND BUILDING CONTROL DIRECTORATE****TOWN PLANNING SECTION****6.1. Sub-Division of Plots**

6.1.1. Residential

6.1.2. Sub-division of plots is allowed only for 9000 sqft plots and above provided 9000 sq ft plot lies in line with 4500 sq ft plots, after payment of dues as per DHA policy. An amalgamated plot can be subdivided into two separate plots provided the construction is done according to the Byelaws of the smaller plot, after payment of dues as per DHA policy.

6.1.3. Sub-division of planned 9000 sqft Category plots is not allowed.

6.1.4. Commercial Sub-division is not allowed.

6.2. Amalgamation of Two Plots

6.2.1. Residential

With specific permission, adjacent plots/land may be combined together to form a single unit upto a maximum of 4 kanals (residential) including extra land (any category) provided the entire piece of land has single ownership. Such units when constructed will not be subdivided unless the complete building is dismantled. Such amalgamated plots/land including green areas will be governed by applicable DHA Building Byelaws **of the larger plot or specially devised bylaws for special case scenario.**

6.2.2. **Amalgamation of Commercial Plots** The amalgamation of small plots (4M & 8M) to more than 2 plots (upto 4x plots) is possible subject to adherence to Byelaws applicable to a single plot of the original size. The amalgamation of bigger size commercial plots will be dealt with on a case-to-case basis with due diligence of site conditions and other governing Byelaws.

6.2.3. **De-amalgamation of Commercial Plots** De-amalgamation of amalgamated commercial plots is permitted subject to submission of payment of applicable dues as per DHA policy.

6.3. Possession of Plots

The following procedure is laid down: -

6.3.1. On clearing all dues, members should apply for the site plan/possession of plots on the prescribed form.

6.3.2. A site plan indicating details (gate, manhole and water point location) shall be provided to the member.

6.3.3. Possession documents will be issued after the DPC-level check of the boundary wall.

6.4. Entry Gate(s)

6.4.1. The position/location of the gate(s) will be kept as per DHA approved site plan part of the master plan.

6.4.2. The gate cannot be fixed on the outer side of the boundary wall.

6.4.3. Two gates shall only be allowed in case of corner plots or plots having roads on any two sides with no DHA green area at the back. Non-corner plots having frontage 70 feet and above can have two gates on the front side but services such as transformer, DB, pole etc in front of the second entry/gate will not be shifted. Charges for the second gate on one side will be the same as opening on two roads charges.

6.5. Two Adjacent Plots using one as Green /Lawn

If a member has two adjacent plots and he uses one plot for the construction of his house and the second as lawn, then the following needs to be complied with: -

- 6.5.1. Both plots must be owned by the same member.
- 6.5.2. If ownership is different than an affidavit on judicial stamp paper of Rs 100/- and a sketch showing detail of the boundary wall and gate duly signed by the approved architect will be required from the second owner that he/she has no objection to utilizing his / her plot as the green area only.
- 6.5.3. Members are to get the site plan/possession of the plot to be utilized as green / lawn.
- 6.5.4. A soundproof generator may be placed after approval from the Competent Authority.
- 6.5.5. A combined boundary wall will be erected and the second gate is allowed on the plot utilized as a green area as per the DHA gate layout plan.
- 6.5.6. A passage/driveway from the gate to the building line would also be allowed, however, no construction of any type such as a porch etc would be allowed.
- 6.5.7. Only one water connection will be allowed for the constructed house(s) and no water connection will be provided for plot(s) utilizing as green. However, rainwater harvesting tank can be constructed in green after written approval from Town planning & Building Control Directorate DHA.

6.6. Extra Land

- 6.6.1. Construction in extra land without changing its category to constructible land is not allowed.
- 6.6.2. Provision of a gazebo / covered sitting area upto 150 sq ft using wood, fibre and/or iron will be allowed after leaving compulsory open space/set-back and approval from TP Directorate DHA.
- 6.6.3. Construction in extra land of Defence Villas will be decided considering the category of extra land on case-to-case basis.(if planned)
- 6.6.4. Members holding extra land 10 marlas & above and maintaining it as a green area will have to pay double water charges.
- 6.6.5. Undertaking for the retrieval/cancellation of extra land by DHA is at Anx E. DHA reserves the right to retrieve or withdraw any extra land having category B or C allotted to the member and the amount paid for such extra land, if any, the same shall be reimbursed to the member. It is declared that extra land does not create any title or right in favour of the member since it is not the part of member's adjacent plot as per the member's entitlement. The cost of any construction therein will neither be claimed by the member nor will be paid by DHA.
- 6.6.6. Construction including water tank, septic tank and spiral stairs in non-constructible extra land is not allowed. However, shades in set-backs and rainwater harvesting tank can be constructed after written approval from Town planning & Building Control Directorate DHA
- 6.6.7. A soundproof generator may be placed in extra land after approval from the Competent Authority.
- 6.6.8. Category 'B' & 'C' land allotted, will be reverted back to DHA at the time of any sale/purchase of plot (if not attached to the constructed house). 100% paid amount by the member will be reimbursed without any increase or decrease.

6.7. Parking Requirements

Parking requirements for vehicles in these Regulations will be applicable under the following conditions: -

- 6.7.1. A new building is constructed or a change of use of the existing building is established.
- 6.7.2. If an existing building is altered and there is an increase in the floor area of the building, then additional parking requirements will apply to the proposed addition only within the property limits as required under these Regulations.
- 6.7.3. The parking space, including ramps, will be exempted from FAR.
- 6.7.4. An upward ramp is not allowed in COS. Only a downward ramp is permitted in COS. The ramp will be excluded from the footprint area.
- 6.7.5. The total parking requirement of every building will be determined as a sum of parking requirements for each type of use of the building.
- 6.7.6. Toilets (including washbasin) for drivers in the parking space must be provided as one toilet per 50 bays and so on. The ratio must be maintained if the number of bays increases by more than 50. For example, 61 bays would require two toilets.
- 6.7.7. A detailed plan will be submitted showing the entry, exit, and gradient of the ramp, turning radius, storage spaces, circulation and movement of vehicles.
- 6.7.8. Electro-mechanical ventilation/exhaust will be provided for parking in the basement(s).
- 6.7.9. At least 16% of the total parking space will be utilized for motorcycle parking.
- 6.7.10. A minimum of 4 parking bays out of every 100 parking bays will be earmarked, duly labelled as such, for universal accessibility/ senior citizens at the most convenient location.
- 6.7.11. Dedicated parking for all types of buildings (Residential, Commercial, and Amenity) should be provided within the premises as per the required numbers based on the planned capacity. Major or associated roads will not be utilized for car parking.
- 6.7.12. In case of Parking Plaza/Basement Parking, proposed floor parking plan with parking lots in relation to column and other amenities shall be submitted, whereby 250 sq ft per vehicle of gross area shall be used as a reference only.

In the case of parking plaza/basement parking, the no of cars will be calculated @ 250 / per sq ft vehicle of the gross floor area.
- 6.7.13. The maximum slope of the ramp in case of parking plaza/basement parking should not be more than 1:7.
- 6.7.14. A minimum one vehicle parking space will be provided for:-
- 6.7.15. Every 500 sq ft of gross floor area for retail shops area, business offices, for all facilities of hotels e.g. bedrooms, restaurants, conference room, indoor recreational area & retail outlets.
- 6.7.16. Every 1000 sq ft of gross floor area for an apartment/ flat of a commercial building.
- 6.7.17. Every 4000 sq ft of gross floor area for all educational institutions or a minimum of one-fourth of motor vehicle parking space will be provided per classroom whichever is more.
- 6.7.18. Every 1500 Sq ft of gross floor area for hospitals.

6.8. Corner Plot

- 6.8.1. The owner of the corner plot will be required to pay an additional (10% of the original total) cost as laid down by DHA.

6.9. Over / Under Size Plots.

6.9.1. Plots measuring less area as compared to standard size plots will be remitted cost of land only. Similarly, those, measuring more than the standard size plot shall be required to pay for the extra/additional area as per the rates decided by DHA. Variations in plot size will be assessed as the cumulative value of the plot. Member will be charged/refunded the difference in cost of both. The cost of an over / undersize plot will be adjusted at the time of the Site Plan Issue for house construction. Variations in plot size up to one marla (225 Sq ft) will be adjusted as per Category 'B' Land cost.

6.10. Annexation of Adjacent Extra / Trapped Land.

6.10.1. In case where extra land is available adjacent to the plot, it may be purchased by the member. Rates and permission of such cases are subject to approval by DHA. Construction on extra land is not allowed without changing its category to constructible.

7. CHAPTER-VIII **TOWN PLANNING & BUILDING CONTROL DIRECTORATE**

BUILDING CONTROL SECTION

7.1. General

- 7.1.1. These regulations have been framed to facilitate construction by the members. Due relaxation has been ensured while specifying the covered area and other details. The designers have been extended leverage to contribute such designs which add to the overall complexion of a healthy environment/development:-
- 7.1.2. Anyone who intends to carry out building works within the boundary of DHA should strictly comply with the requirement of these Byelaws.
- 7.1.3. The plot shall be strictly utilized for the purpose it has been allotted. To preserve the sanctity of planning,
NO DEVIATION SHALL BE PERMITTED.

7.2. Lighting and Ventilation

7.2.1. Size of External Openings

Every room, other than rooms used predominantly for the storage of goods, shall be provided with natural light and natural ventilation utilizing one or more openings in external walls. These openings shall have a combined area of not less than 10% for habitable rooms and 7.5% for other rooms of the floor space of such openings and the whole of such openings shall be capable of allowing free and uninterrupted passage of air.

- 7.2.2. Area for openings in case of a warehouse, godown, storage places etc shall not be less than 5% of the floor space unless the space is mechanically ventilated.

7.2.3. Size of Internal Openings

Unless the light and ventilation requirements are met by an air well or ventilation duct, all internal habitable rooms must have openings in internal air wells in addition to door openings not less than 7.5% of the floor area of such room. Access for maintenance of the shaft is to be provided at the level from where the shaft commences.

7.2.4. Internal Air Wells

Habitable rooms may receive daylight and natural ventilation from internal air wells which shall conform to the following minimum sizes: -

- a. For buildings upto 2 storeys, 20 Sq ft with a minimum width of well 5 ft.
- b. For buildings with 3 to 5 storeys, 100 Sq ft with min width of well 8 ft.

- 7.2.5. Where only kitchens, WC and bathrooms receive daylight and ventilation from air wells, their sizes shall conform to the following as a minimum: -

- a. For buildings upto 2 storeys, 25 Sq ft with a minimum width of well 3 ft.
- b. For buildings with 3 to 5 storeys, 50 Sq ft with a minimum width of well 5 ft.

7.2.6. Permanent Openings in Kitchen

Every kitchen shall have openings for permanent ventilation into the external air space not less than 15 % of its floor area.

7.2.7. Water Closet, Bath Room & Ablution Places

Every water closet, urinal stall, bathroom and ablution area shall be provided with natural lighting and ventilation utilizing one or more openings in external walls having a combined area of not less than 2 Sq ft per water closet, urinal or bathroom except where adequate and permanent mechanical ventilation is provided and which discharges into an open space.

7.2.8. Garages

Every garage shall be provided with an opening of not less than 5% of the floor area for ventilation and lighting incorporated in a wall or the door.

7.2.9. Staircase

All staircases which are enclosed shall be provided with adequate lighting and ventilation from openings not less than 7.5% of the staircase area.

7.2.10. Mechanical Ventilation & Central Air Conditioning Waiver-Minimum Requirement

Where undertaking for central air conditioning and permanent mechanical ventilation is provided, the relevant clauses of these regulations dealing with natural ventilation, lighting and heights of rooms may be waived.

7.2.11. Where permanent mechanical ventilation in respect of lavatories water closets, bathrooms or corridors has been provided, conditions relating to natural ventilation and natural lighting under these Regulations shall not apply to such lavatories water closets bathrooms or corridors.

7.3. Bearing Capacity Test

7.3.1. Bearing capacity tests will be arranged by the member through DHA approved firm/laboratory. The approved firm list is available in Town planning & Building Control Directorate.

7.4. Foundations

7.4.1. Geo-Technical Investigation Before structural designs of buildings, soil investigation with a minimum of two boreholes with depths depending on the height of the buildings will be carried out. However, at times, the builder may be asked to carry out tests to prove the nature of the soil, wherever considered necessary by the DHA.

7.4.2. Foundations near Drain Where a building is to be constructed near a drain or an excavation at a distance less than the depth of the said drain or excavation, the builder will make sure that the foundation of the building is safe.

7.4.3. Structural Calculations The designer shall submit structural calculations and a certificate from Structural Engineer to verify the structural stability of foundations and superstructure if required by DHA.

7.5. Preparation of Building Plans

7.5.1. For the preparation of building plans (new or alteration) the member should engage a licensed architect and structural engineer on the panel of DHA.

7.6. Submission of Drawings

7.6.1. The member shall submit the undertaking at Anx F along with the application (Anx G, H & J), three sets of drawings (in ammonia prints) duly signed and stamped by the DHA registered Architect along with the

soft copy covering the following details: -

- 7.6.2. The size of the sheet should be 30x40 inches (**Anx Z**) and all details are to be given at a minimum scale of 1/8 inch on the same sheet.
- 7.6.3. The plans of a basement, ground floor and first floor, if any and the roof along with mumty.
- 7.6.4. Front elevation, longitudinal section passing through stairs and site plan/key plan showing the width of the road. In the case of a corner plot, 2x elevations are required.
- 7.6.5. Elevation and section of boundary wall, gate, ramp and water channel for adjoining road/street.
- 7.6.6. External dimensions of the building.
- 7.6.7. Internal dimensions of all rooms.
- 7.6.8. The position and dimensions of all projections beyond the walls of the building.
- 7.6.9. Roof plan showing the location/dimension of the overhead water tank, mumty.
- 7.6.10. Total height of building showing reference point including the level of finished floor and split- levels (levels be indicated on plans also).
- 7.6.11. The location of the reference service manhole and its invert level and the location of the water connection shall be clearly shown on the submission drawing.
- 7.6.12. Schedule of open/covered areas.
- 7.6.13. Schedule of doors and windows.
- 7.6.14. Covered area calculation block plan.
- 7.6.15. Signature of the Owner and the Architect on drawings along with required DHA forms.
- 7.6.16. Drawings must be of acceptable Architectural standards.

- 7.6.17. Attested copy of ID Card, Allotment letter, Possession form, Site Plan, NOC form duly verified by Transfer & Record Directorate and Finance Directorate, 3x set of submission drawings (ammonia print), soft copy of drawing (in CD), bearing capacity report, duly signed undertaking by the architect and structural engineer on a prescribed form and prescribed dues (scrutiny fee water charges) as decided by DHA from time to time.
- 7.6.18. Besides the undertaking of the Architect (Anx K) and structure engineer (Anx L), the contractor will be responsible for the execution of work as per the approved drawings from DHA duly submitted by the Registered Architect/ Structure engineer.
- 7.6.19. In case there is any modification required in the approved plan, the owner will be responsible for submitting the drawings through a registered Architect/ Structure Engineer to DHA before execution on site.
- 7.6.20. Soil test report duly signed and stamped by the DHA registered firm along with 1xset of structural drawings on an A3 sheet duly signed by the DHA's approved structural engineer along with the certificate (Anx M) on letter head that the structure is safe. These drawings should show the layout and sectional details of foundations, beams columns, lintels, slabs, underground and overhead water tanks. This set of drawings is only for DHA records and DHA has no responsibility regarding the stability/safety of the structure. In any case, the member and structure engineer will be responsible for any loss or damage to the building. In the case of commercial drawings, the structure should be duly vetted by the DHA-approved vetting engineer.
- 7.6.21. Security charges as per DHA's approved rates. These will be refunded at the time of issuance of the completion certificate.
- 7.6.22. Isometric color view on a separate A4 paper with a soft copy (JPG).

7.7. Approval of Submission Drawings

- 7.7.1. The following procedure will be followed: -
- The member will submit the plans to DHA for approval as per DHA Byelaws.
 - Plans not conforming to DHA Byelaws will be returned to the architect along with reasons by mail / may be collected by hand, otherwise, the member can collect approved drawing with permission letter and SOP for demarcation check within 15 working days.
 - In the case of observation on drawings, the time for approval will be 15 working days after re-submitting the drawing after rectifying the observation.

7.8. Revised Submission Drawing

- 7.8.1. If any change (demolition or addition) in the building plan is required, the revised drawing should be submitted for approval before making any changes. Member can collect approved revised drawing within 15 working days.

7.9. Revalidation of Submission Drawing

7.9.1. The approved submission drawing is valid for three months and if construction of a house is not started within three months, then the member will have to revalidate the drawing from DHA after payment of prescribed charges. However, the date of approval of 1st submission drawing will be taken as the approval date for the calculation of completion dues.

7.10. Oversight in Scrutiny of Drawings

7.10.1. Any oversight in the scrutiny of documents and drawings at the time of approval of the building plan does not entitle the member to violate the Byelaws.

7.11. Registration of Contractor / Vendors and Earthmoving Machinery Contractors/ Miscellaneous Firms

7.11.1. All contractors currently involved in the construction of houses or intend to construct houses in DHA, registration of these contractors with DHA is mandatory with effect from 01 July 2024. For registration, security verification and registration forms are available with the concerned Building Control Office. The concerned Building Control Office will issue these forms to the candidate (contractors) and ask them to get themselves registered with DHA by adopting the procedure as mentioned below: -

7.11.2. Security verification form duly completed along with supporting documents will be deposited with Security Directorate within 8 x days of receipt of the form for necessary verification.

7.11.3. Registration form along with supporting documents will be deposited with the Design Section of the Town planning & Building Control Directorate within 8 x days of receipt of the form. Upon receipt of the security verification letter from the Security Directorate, a registration letter/certificate will be issued by Building Control Sec accordingly.

7.11.4. Renewal of registration will be done on annual basis. Contractors are required to process their renewal cases one month before the date of expiry of their registration.

7.11.5. Undertaking on judicial stamp paper will be provided by the contractor (spaceman attached as **Anx N**).

7.11.6. **Cancellation of Registration / Blacklisting** On receipt of any complaint, DHA reserves the right to cancel the registration and blacklist the contractor, if necessary.

7.12. Demarcation of Plot

7.12.1. Demarcation of the plot will be done, after the provision of documents at Anx D, along with approved Submission Drawings.

7.13. SOP for Demarcation Check

7.13.1. Members are advised to follow the steps given below for demarcation of the plot before taking over construction and thereafter for confirmatory check by the survey team of DHA: -

7.13.2. **Step-I.** Member will apply and coordinate with Building Control Section for the demarcation along with the inspection chart earlier issued. The following items on the site at the time of demarcation will be arranged by member: -

- a. 4 pieces of PVC 4-inch dia pipe 2-½ ft in length each.
- b. Cement, aggregate/sand/water etc.
- c. Required labor with a pick, shovel etc.
- d. Pillars will be grouted/installed by the survey team in the presence of the owner/contractor, which should not be disturbed or removed till the final demarcation of the boundary wall upto DPC level.

7.13.3. **Step-II.** Town planning & Building Control Directorate has to ensure that the member gets the 2nd demarcation on lean after excavation of the boundary wall before starting any construction activity on the inner building in case of no basement. However, demarcation on lean & DPC level of boundary wall of houses with basement has to be ensured on completion of the basement.

7.13.4. **Step-III.** Before starting the construction of the building above the plinth level, the member must intimate Town planning & Building Control Directorate for demarcation at the DPC level.

7.13.5. **Note**

The subject SOP is laid down for the convenience of members/contractors to avoid any violation/embarrassment at a later stage. Please follow these SOP strictly otherwise the members will be held responsible for any violation.

7.13.6. Fine charges applicable as per DHA policy mentioned in **Chapter-XV** on the revision of initial demarcation on the disturbance of pillars and issue of a new Inspection Chart in case of loss respectively.

7.13.7. It is primarily the responsibility of the member to ensure the inspection of work on each stage of construction as per the Inspection Chart and signature of the building inspector of DHA. If any anomaly occurs at a later stage, the member will be responsible.

7.14. Store Plot

7.14.1. DHA shall formally provide a vacant plot or equivalent space as a store plot, after demarcation, which will be used for storage of construction material, establishing a temp store room to temporarily keep debris. This plot/space will not be used for any other purpose and will be restored to the original level & cleanliness by the concerned member, before getting NOC for shifting or as and when desired by DHA at any stage. Any other plot or space occupied by any member other than the store plot shall be considered encroachment and shall be fined as per DHA policy.

7.15. Construction along DHA Boundary Wall

Houses located along the DHA boundary wall are allowed to rebuild the DHA boundary wall after getting formal permission from the concerned TPBC, PD & Security office, as per their site/design requirements.

7.16. Service Connections

The concerned PD Office shall provide a water connection and allow the member to apply for an electric connection only after demarcation.

7.17. Levelling of Plots

In case of any abnormality in the plot such as a ditch, mound, trees, seepage etc DHA will not be responsible for any protective work or development within the plot line.

7.18. Plots at Different Levels

Water leakage/seepage treatment should be mentioned in the submission drawings for side-by-side / back-to-back / adjacent plots.

7.19. Monsoon / Rainy Season / Winters

7.19.1. No excavation of the plot will be allowed to be undertaken during the monsoon / rainy season.

7.19.2. Demarcation of plots will be halted a week before the start of the monsoon (15 July approximately).

7.19.3. DHA will cancel the demarcation and permission to construct all sites/plots on which work had not started despite being demarcated well before the start of the monsoon season.

7.19.4. Member will get fresh demarcation after the end of monsoon. No work will be undertaken on the plot without new demarcation.

7.19.5. No spouts shall be provided on the top roof for drainage of water. It shall be drained through concealed pipes.

7.19.6. No construction activity will be allowed to be undertaken during extreme cold months, i.e, December, January and February.

7.20. Disposal of Rain Water through Lower-Level Plots

7.20.1. The owner of the lower-level house will install a 6-inch dia pipe through the boundary / retaining wall for disposal of trapped water on the rear higher-level plot. The condition should be clearly mentioned on the submission drawing that this is a temporary arrangement for the safety of the lower-level house/plot till the construction of the house on higher level plot. In no case, the owner of a higher-level plot can use it for the disposal of rainwater through the setback of the rear house on permanent bases. The plot of a higher reference road that has a lower level from the road is allowed to dispose of trapped water through a 6-inch dia pipe as mentioned above.

7.21. Stability of Adjacent Building

7.21.1. If a plot is excavated for the foundation, the owner needs to ensure that adequate steps are taken before and during the work to prevent the total or partial collapse or damage to any adjacent building, neighboring compound walls, foundations and structures etc. A safety distance of 5'-0" is to be left while excavating the basement/level difference plots with neighboring plots with the constructed house. The

owner of the under-construction property who started excavation for basement/level difference plots will make good any damage occurring due to excavation. DHA will issue a stop work notice if the owner fails to take remedial action.

7.21.2. Demolition of a house/building is not permitted without prior approval of the Authority, the defaulter may be violation charged as decided by the Authority.

7.22. Filling of Excavated Site / Incomplete Buildings

7.22.1. A site once excavated shall not be kept open and idle for a period beyond the validity period of the building plan, failing which the Authority shall not revalidate the plan and in case of any mishap, the owner shall be responsible for any damage or loss to any person and property of the affecters.

7.22.2. A building once started after the approval of the drawing may not be left incomplete or abandoned for an indefinite period. In such cases, the building plan will be invalid to start the reconstruction. Authority may take any appropriate actions to guard against any mishap, safety/security hazard and pollution of the environment.

7.22.3. Any excavation posing threat to public safety i.e, to a person, vehicle, etc shall be appropriately marked as well as necessary protective works erected by the person, to avert any mishap. Failure to do so shall make the person liable to be penalized by the Authority, including making good any losses so caused.

7.23. Inflammable Material

7.23.1. Storage of inflammable material on the construction site is strictly prohibited.

7.24. Termite Proofing

7.24.1. Members will ensure termite-proofing treatment during the construction stage.

7.25. Blockage of Street

7.25.1. No part of any street shall be used in connection with the construction, repair or demolition of any building without prior written permission of DHA. The street will not be blocked under any circumstance.

7.26. Blasting

7.26.1. Blasting is not allowed for any type of work in the DHA area.

7.27. Boundary Wall

7.27.1. Boundary walls abutting the public streets, footways, or places which the public is allowed to use, shall not have fencing consisting of barbed wire or any material likely to cause injury to persons or animals.

7.28. Approved Drawings on Site

7.28.1. The member/contractor must keep one set of approved drawings on-site, which may be made available to DHA staff during the inspection. In case of non-availability of approved drawings, a fine would be imposed as per DHA policy.

7.29. Byelaws for Building Constructed Before Merger in DHA

7.29.1. House/building is constructed before the merging of societies in DHA the violation may not be objected to and the completion certificate will be issued accordingly.

7.30. Inspection during Construction

7.30.1. It is the responsibility of the owner to get the site inspected as per the stages mentioned in the inspection chart and in case of any violation, the member will remain responsible.

7.31. Construction Period

7.31.1. The member must complete construction on the residential/commercial plot within 3 years from the date the building plan is approved. If a member fails to get the demarcation within 3 months member will have to re-validate the site plan/drawing. The construction period will be taken from the date of re-validation of the site plan/drawing. In case a building is not completed/occupied within 3 years, a penalty would be imposed as per DHA policy. The rate of penalty will be doubled for the second year of delay i.e fifth year.

7.31.2. The construction period for special/mega commercial projects will be decided by the CA on case-to-case basis.

7.32. Abandoned House

7.32.1. **Completed:** In case the house construction is abandoned without any arrangement of security and the non-payment of penalty/charges despite a specified no of notices, DHA shall be entitled to cancel the allotment of the plot under the DHA Act and take over physical possession of the plot without any objection whatsoever raised by the member. Security money deposited by the member be confiscated and the member will have to apply for fresh possession after clearance of all charges including a non-completion penalty with fresh security money before he is handed over the possession of his abandoned Plot /house.

7.32.2. Incomplete: In addition to the above-mentioned actions, DHA will be empowered to take all measures necessary to ensure the safety and security of the neighborhood including sealing the premises and backfilling all diggings/structures that can potentially hold water leading to diseases / poor hygiene situation.

7.33. Procedure for Issuance of NOC for Occupation of House / Plaza (Documents detail at Anx "D")

7.33.1. Application from the owner with his signature along with undertakings Anx A, B & C.

7.33.2. On receipt of the application from the member, the respective Building Control Inspector will visit the site for inspection of the house/verification of violations (if any).

7.33.3. Intimation will be forwarded to Transfer and Record Directorate for their inspection/verification of property line violations.

7.33.4. On compilation of Building and Property Line violations, the respective Building Control Officer will issue an intimation letter to the member for necessary rectification with info to Town planning & Building Control Directorate.

7.33.5. In case of no violation, NOC for the occupation of a house will be issued by the respective Building Control Officer to the member after approval of all concerned.

7.33.6. In case of partial occupation of any floor, the same procedure will be followed and the member will be required to give clear timelines for full completion.

7.33.7. NOC for the occupation of a house will be issued to the member within 10 days (after rectification of violations).

7.33.8. Illegal occupants and violators will not be entertained with social & civic facilities of DHA and a fine will be imposed as per DHA policy.

7.34. Procedure for Issuance of Completion Certificate

7.34.1. It is mandatory for the member to apply for completion as the house is completed, failing which a fine will be imposed as per DHA policy. The member will apply for the house completion certificate in the relevant phase of the Town planning & Building Control Directorate along with the following documents:

-

7.34.2. 2x sets of completion (As Built) drawings (ammonia print) duly signed and stamped by the registered DHA Architect.

7.34.3. Inspection Chart duly signed by the concerned Officer during construction. (in original)

7.34.4. Soft copy of the completion drawing. (CD) and undertakings Anx A, B & C.

7.34.5. After the receipt of the completion drawing, DHA technical staff shall arrange to inspect such work and after inspection either approve or sent observations / regularize minor deviations with a penalty at rates as approved by the DHA from time to time.

7.34.6. In case of no violation, the completion case shall be put upto the DHA Executive Board for final approval.

7.34.7. In case of violation, the member shall be asked either to pay the prescribed penalty against minor deviations to rectify the observations within 30 days from the date of receiving the observation letter or the completion plan shall be returned unsanctioned with an order for demolition of the subject unauthorized construction. The case will be processed for the issue of the completion certificate after the rectification of observations by the member.

7.34.8. Prescribed dues for completion certificate should be submitted as decided by DHA from time to time.

7.35. Revised Completion Plan

7.35.1. If at any stage after the completion plan of the building has been issued, any additions/alterations/renovation are made within the same building, approval of such revised completion plan from DHA shall be mandatory.

7.36. Cancellation of Completion Plan

7.36.1. If at any stage after getting completion a member is found violating DHA Bylaws: -

7.36.2. Member will be served three notices and completion will be cancelled after issuance of the final notice.

7.36.3. The fine will be imposed as per policy in the monthly utility bill after issuance of final notice till the removal of violations and application for revised completion.

7.36.4. If any member fails to pay the fine within the specified time period and persistently violates the Byelaws, then DHA reserves the right to disconnect/discontinue services till payment of the fine and all the violations are rectified/cleared which will be verified by Town planning & Building Control Directorate.

7.37. Addition / Alteration

7.37.1. No construction, addition or alteration shall be allowed unless drawings are approved by DHA. Any change after the approval of the submission drawing will be regularized through the submission of revised drawings.

7.38. Construction without Approval

7.38.1. Any construction started/carried out without prior approval of authority shall be liable to be demolished (partly / wholly) with or without notice at the risk and cost of the owner.

7.39. Disputes

7.39.1. No member (by virtue of one's status) is allowed to stop the construction activity of other members. Any dispute in the interpretation of Byelaws shall be referred to DHA.

7.40. Duplicate Copy of Document/s

7.40.1. Copy of submission drawing/completion drawing / CD/soil test report or any other document may be given to the owner (if available in the record) by charging as per DHA applicable for each document.

7.41. Imposition of Utility Bills

7.41.1. The utility bills will be issued as soon as the member applies for occupation / partial occupation or physically occupies or partially occupies the house or start the process of completion certificate.

7.42. Generator

- 7.42.1. The generator shall not be used as a prime source of electric supply. It may be used as a standby with the following conditions: -
- 7.42.2. Residential
- 7.42.3. Petrol or diesel-driven generators with soundproof (75 decibels at 1 meter) canopy may be installed. Prior written permission from Gas Regulatory Authority shall be obtained by the member if a gas-driven generator is installed.
- 7.42.4. Noise beyond the boundary limit shall not be more than 15 decibels. Proper arrangements for noise control shall be made.
- 7.42.5. A generator can be placed in the basement (subject to proper ventilation), rooftop on the front side or the front lawn, 5 feet away from the common boundary wall. However, the generator shall not be placed in the rear & side clear spaces on the ground floor and terraces on the first floor.
- 7.42.6. The resident who installs the generator on the roof slab will submit a stability certificate from a qualified structural engineer for the soundness of the slab against the weight/vibration of the generator.
- 7.42.7. The resident will submit an affidavit to compensate damage to the person/property of adjoining houses if it is caused due to improper placement of the generator and shall remove the generator without any claim/charges as and when directed by the Authority.
- 7.42.8. Access to the rooftop through an internal stair or spiral stair installed at the rear is compulsory to install the generator on the rooftop.
- 7.42.9. The maximum capacity of the generator shall be 15 KVA for the residential building.
- 7.42.10. **Commercial** The maximum capacity of the generator shall be 100 KVA for the commercial building on the rooftop. The generator set will be diesel-driven only with a soundproof canopy to avoid noise pollution. The owner shall get permission from the Authority before installation of a generator. Type of Commercial Buildings Generator Capacity suggested: -
- 7.42.11. Sector Commercial 100 KVA.
- 7.42.12. Upto 6 Marla 150 KVA.

7.42.13. Upto 8 Marla 200 KVA.

7.42.14. 16 Marla and above 400 KVA to obtain permission the owner shall submit the following documents with the application: -

7.42.15. Stability certificate from a structural engineer for placing the generator on the rooftop.

7.42.16. NOC from the owner of the building.

7.42.17. An affidavit from the owner that he will compensate any damage to persons/property of others if caused due to improper installation of the generator and that the owner shall remove the generator without any claim/charges as and when directed by the Authority.

7.43. Green Roof

7.43.1. All types of Green Roofs may be designed and executed up to the height of the parapet wall. The landscape/garden feature may include a BBQ counter, fountain, reflection pond, etc. Green areas can be created on the rooftop to avail the unutilized space for sitting purposes. The innovative idea is in sync with the theme of Green DHA. To implement the innovative idea of the green rooftop, the following parameters are given: -

a. Only in 1 Kanal and above houses.

b. The plant's height should not be more than 5'-0".

c. Plantation should be along the parapet wall to create an offset for ensuring the privacy of neighbours.

d. No sheds/ pergolas (fibreglass, steel, wooden) are allowed to be constructed.

e. No louvres/railing will be fixed on 5 feet parapet wall.

f. Member will furnish an undertaking that the privacy of the neighbour will not be compromised and the rooftop facility will not become a nuisance for others.

g. Waterproofing of roof to be ensured

7.44. Renovation / Alteration

7.44.1. Any member undertaking renovation/alteration works in their existing house/building will ensure the following: -

7.44.2. Will furnish an undertaking as per specimen attached as **Anx O**.

7.44.3. Member will get approval for renovation/alteration works from the concerned office and will get revised drawings approved if there is any structural change/change in the covered area.

7.44.4. All works will be completed within 30 days (or any other specified period) from the date of issuance of the permission letter.

7.44.5. Debris in open plots or roadside will be removed simultaneously, and will not be allowed to accumulate.

7.44.6. The construction material will be stacked within the area of the house/building.

7.44.7. For renovation/alteration, the house/building will be treated as an "under construction" site and compliance with the above-mentioned undertaking and DHA Byelaws/rules will be mandatory, DHA may disconnect the services of the house/building or impose a fine as per rules.

7.45. Roof Top Commercial

7.45.1. Commercial activity on the rooftop of a commercial building will be allowed only if the following is ensured:

-

- 7.45.2. No permission to make a permanent structure like a kitchen room, store room, living room, generator room, guard room etc, except for lightweight structures like gazebos, pergolas or movable umbrellas etc.
- 7.45.3. The top roof will only be used for sitting purposes and not for living or storage purposes.
- 7.45.4. Permission will be cancelled in case of any activity which causes a nuisance to adjacent residents by any means. In case of violation or complaint by neighbours, DHA management can impose a fine / cancel the permission.
- 7.45.5. The owner will be fully responsible for any loss/ damages/ incident/ mishaps by any means.
- 7.45.6. High-rise trees/ plants are not allowed with common parapet walls.
- 7.45.7. Sitting plan, safety and privacy arrangements will be allowed after approval by the authority.
- 7.45.8. No additional stairs case (temporary/permanent) falling outside the building line will be allowed for rooftop commercial.
- 7.45.9. The owner will undertake (Undertaking at **Anx P**) to abide by all DHA Byelaws / instructions/regulations issued from time to time or changed by authority.

7.46. Dangerous Buildings

- 7.46.1. **General:** All such buildings or structures which are declared as dangerous by the Evaluation Committee will be considered in two categories: -
- 7.46.2. **Category-1:** Any building or structure whose strength stability, serviceability, robustness or durability has been impaired due to any reason such as improper structural design and detailing, faulty or poor construction, decay, dilapidation, obsolescence, natural disasters or leading to abandonment due to all these reasons to a level, where it cannot be restored to its original status, shall classify as “**Dangerous Building Category-1**”, and shall be liable to be demolished.
- 7.46.3. **Category-2:** Any building or structure or part thereof whose strength, stability, robustness, serviceability or durability has been impaired due to all such reasons ascited in paragraph a to a level, where it could by way of strengthening, appraisal and restoration be brought partially or wholly near to its original status, shall be classified as “**Dangerous Building Category-2**”.

7.46.4. The constitution of the Evaluation & Dispute Resolution Committee is as follows: -

President – Secretary DHA

Members:

Chief Engineer

Director Building Control Director

Town Planning Director Legal

GM (Civil/ Electrical)

Nominated Senior Architect(s) registered with PCATP & DHA Nominated Senior

Structure Engineer(s) registered with PEC & DHA

7.46.5. Buildings Unfit for Human Habitation and Notice of Prohibition

7.46.6. If for any reason it shall appear to the Evaluation Committee that any building or part thereof intended or used for human habitation or human occupation for any purpose whatsoever is unfit for such uses, it shall signify its intention to prohibit the further use of such a building or part of a building and call upon the owner or occupiers or tenants to state in writing their objections (if any), to such prohibition within fifteen days (or less if so advised by Senior Structural Engineer) after the receipt of such notice. If no objection is raised by such owner or occupier within the prescribed period or if any objection which is raised appears to the evaluation committee to be invalid or insufficient, the evaluation committee may prohibit by an order in writing, the further use of such a building or part thereof. The owner or occupier of the building shall be given an opportunity of appearing before the President of the Evaluation Committee in person or through an agent to plead in support of his/ her objection if he/she so desires. A Public Notice to this effect will be published by DHA in leading Urdu and English daily newspapers.

7.46.7. A thirty days' notice of such prohibition shall be served in person or by any courier service, mail, or by pasting at the site in the presence of an officer authorized by the Evaluation Committee, before which every such person shall remove himself and his property from the said building or part thereof; failing compliance the evaluation committee may cause him/her and his/her property to be removed at his/her risk and cost. In case of imminent danger, twenty-four hours' notice may be issued by the Evaluation Committee.

7.46.8. When a building or part of a building has been vacated the owner shall display at each entrance at prominent places to such building a notice to read **“DO NOT ENTER, UNSAFE TO OCCUPY”** in English and Urdu. Such notice shall remain displayed until the required repairs, demolition, or removal are completed.

7.46.9. Alteration, Modification or Repairs of Dangerous Buildings

- 7.46.10.** At any time after a building or part of a building has been vacated, if the Evaluation Committee considers that it can be rendered fit for human habitation by the structural alterations, repairs or modification and updates or repairs before or after the vacation of inhabitants from such buildings, the Evaluation Committee may by notice in writing, call upon the owner to commence through professional, within such time as may be specified (but not less than thirty days), and to complete within the period as specified in the notice but not more than ninety days from the date of receipt of such notice, such structural alterations, modifications, updates or repairs, as deemed necessary. If within the aforesaid period such alterations, modifications, updates or repairs have not been completed to the satisfaction of the Evaluation Committee, it shall issue to the said owner a notice in writing ordering the demolition within thirty days from the date of receipt of such notice. In case of Noncompliance with the instructions in the notices, DHA may order a complete vacation of the Building and then proceed with demolition at risk and cost of the owner.
- 7.46.11.** If the Evaluation Committee considers it impracticable to render such a building or part thereof fit for human habitation, the DHA, may by notice in writing, call upon the owner to demolish it in a period specified by the Evaluation Committee.
- 7.46.12.** Demolition of Dangerous Building on Expiration of Notice Period: If at the expiration of the period specified in the notice and order to demolish a building or part of a building issued under clause 9.44.4.2 has not been complied with, the DHA may direct, by an order in writing, the demolition thereof through an approved contractor who has on his roll at least one professional responsible for undertaking all necessary safety measures during the process of demolition as per procedure laid down by the Evaluation Committee.
- 7.46.13.** Extension of Period for Repairable Buildings: For sufficient causes, the Evaluation Committee may extend the time allowed as required.
- 7.46.14.** Evacuation of Dangerous Buildings
- 7.46.15.** If in the opinion of the DHA, any building, wall, or structure or anything affixed thereto is in a hazardous or dangerous state, DHA may, by notice in writing, require the owner or occupier thereof forthwith either to remove the same or to cause such repairs to be made thereto as the DHA considers necessary for the public safety and if the danger appears to be imminent, the DHA may forthwith take such steps as may be required to avert such danger, including the evacuation without notice from such a building of all the occupiers thereof.
- 7.46.16.** Any expenses incurred by the DHA shall be paid by the owner concerned.
- 7.46.17.** When the owner of any building, wall, structure or anything affixed thereto fails to execute the repairs required from him by the DHA, the tenant or occupant of such building, wall, structure or anything affixed thereto may, with the previous approval of the DHA, carry out such repairs.
- 7.46.18.** Except with permission in writing from DHA, no person shall enter into or remain in any building from which the tenant or occupant has been removed.

7.47. Enforcement by DHA

- 7.47.1. Administrator DHA may direct the concerned officer (under whose jurisdiction violations have occurred) to take action under these Regulations concerning any violation including entering upon and sealing of premises.
- 7.47.2. Appeals
- 7.47.3. Within thirty days from the date of receipt of any order of DHA under these Regulations or of its determination on an appeal under the preceding sub-Regulations, the aggrieved person so served may appeal to the Administrator, which may allow him to be heard, if deemed appropriate or worth hearing, and any dispute to be cleared within one month.
- 7.47.4. The Administrator may arrange a hearing of the person by himself or depute an officer for the purpose. The deputed officer or officers shall report, may be written or verbal, along with recommendations to the Administrator.
- 7.47.5. DHA after considering a report and any recommendations of the hearing officer, may affirm, modify or amend the order or determination.

7.48. Consulting Engineers Requirements

- 7.48.1. Structural designs and drawings shall be prepared by PEC Licensed Consulting/Structure Engineer (for civil works). If a Licensed Consulting/Structure Engineer stamps a drawing, prepared by another engineer, he shall be permanently banned by DHA from practice. He shall design, stamp and sign himself, without this NOC shall not be issued. DHA Design Wing can demand detailed design calculations for residential structures, however, it is mandatory for commercial/apartments/public buildings. Approved vetting engineers can stamp drawings after verification of detailed calculations and drawings.
- 7.48.2. Approved drawings shall be available at the site during construction.
- 7.48.3. All stages shall be checked and signed by Site Inspectors continuously. In case of any discontinuity of checking, construction may be stopped.

7.49. Health and Safety Guidelines

- 7.49.1. Architects and engineers should make sure safety of the building by practicing proper engineering techniques, professional skills and execution procedures as per health and safety standards.
- 7.49.2. Architects, engineers and other professional persons involved in the design of a building should make sure not to include anything in the design that would necessitate the use of unwarrantably dangerous structural procedures and undue hazards, which could be avoided by design modifications.
- 7.49.3. Every member, contractor and sub-contractor shall make safety arrangements during the operation, handling, transport, and storage of building materials at the site.
- 7.49.4. Every member, contractor and sub-contractor shall ensure that all workers are properly informed of the hazards of their respective occupations and the precautions necessary and adequately supervise to avoid accidents, injuries and risks to health in particular that of young workers, newly engaged workers and illiterate workers.
- 7.49.5. Blasting and use of explosives for excavation/demolition are not allowed.

- 7.49.6. Debris shall be handled and disposed of by a method, which will not endanger workers and public safety and health.
- 7.49.7. No one under the age of 14 is permitted on the Habitat construction site.
- 7.49.8. Use of ladders is not allowed during poor weather or on windy days.
- 7.49.9. The safety of the worker, labour and visitor will be the sole responsibility of the member/owner.

7.50. **Structural Design Requirements**

- 7.50.1. Earthquake Resistant Design
- 7.50.2. The structural design of the buildings and their individual elements shall conform to the requirements of the National Building Code of Pakistan / ACI Code / Uniform Building Code.
- 7.50.3. The Seismic Zone factor for buildings shall be based on the latest Report of Building Control and Town Planning, Baluchistan (Seismic provisions 2021).
- 7.50.4. **Structural/Engineering Design** Basic loads to be considered in Design: Following loads shall generally be taken into account, as a minimum.
- a. Dead loads.
 - b. Live loads.
 - c. Earth pressure (For retaining walls).
 - d. Pressure of water and other liquids, if any.
 - e. Winds loads, where they govern the design.
 - f. Seismic loads.
 - g. Temperature loads (For longitudinal buildings), etc.
 - h. Additional loads to be included in special cases: following loads shall additionally be taken into account, where there is a reasonable probability of their occurrence or in cases where the applicable codes require that they also be considered:
 - i. Explosion (use the specific risk specified).
 - h. Impact (use the specific risk specified).
 - j. Removal of support (use the specific facts of the case and only when undertaking modification of an existing building).

k. Load combinations for the service and ultimate load condition shall be considered as per the ACI code.

7.50.5. Codes and Standards

BCTP-SP-2021	Building Control and Town Planning, Balochistan (Seismic provisions 2021).
BCP-SP-2007	Building Code of Pakistan (Seismic provisions 2007).
ACI 318-2008	Building Code Requirements for Reinforced Concrete, American Concrete Institute.
ASCE 7-05	Minimum design loads for buildings and other structures.
ACI 301-1995	Specifications for Structural Concrete, American Concrete Institute.
ASTM A 615	Specifications for deformed steel bars for Reinforced Concrete.
ASTM C 150	Specifications for Portland Cement.
ASTM C 33	Specifications for Concrete Aggregates.
IBC 2006	International building code.
UBC 1997	Uniform Building Code of USA.
AISC	American Institute of Steel Construction.
AISI	American Iron and Steel Institute.

7.50.6. Geotechnical Investigations They shall be done in the light of the specific details of the building, the order of loads and special requirements if any. The space and quantum of testing shall be consistent with the applicable parameters of the project.

7.50.7. Unit Weight of Structural Materials The following unit weights of structural materials shall be used:

-
- Reinforcing bars: 490 lbs/cu.ft (77.0 kN/cu.m)
- Reinforced Concrete: 150 lbs/cu.ft (23.6 kN/cu.m)
- Lean Concrete: 145 lbs/cu.ft (22.6 kN/cu.m)
- Mortar: 145 lbs/cu.ft (22.6 kN/cu.m)
- Compacted earth: 120 lbs/cu.ft (18.8 kN/cu.m)

7.50.8. Design Strength Of Materials Following strength factors shall be used in design calculations:

7.50.9. Reinforced Concrete Minimum compressive cylinder strength at 28 days equal to 3000 psi (280 kg/sq.cm) shall be considered for slabs, beams and columns.

7.50.10. Plain Concrete Minimum compressive cylinder strength at 28 days equal to 2500 psi (176 kg/sq.cm) shall be considered for Lean, blinding and filled concrete.

7.50.11. Reinforcing Steel All reinforcing steel to be used in reinforced concrete works shall conform to ASTM A615 / A706 Grade 60 with a minimum yield strength of 60,000 psi.

7.50.12. Structural Drawings Structural drawings shall show the information and level of detail customarily required to be carried out by design drawings.

7.50.13. Drafting shall follow the generally accepted conventions and practices.

7.50.14. No revision shall be made without the mutual consent of the Structure Engineer & Architect.

- 7.50.15. All drawings shall be numbered and revision numbers with dates shall be clearly marked.
- 7.50.16. The structural drawings/documents shall also show the following information:
- 7.50.17. Specific values of the various geotechnical parameters adopted.
- 7.50.18. Specific values of the various parameters adopted for computation of the earthquake loads and the code of practice followed.
- 7.50.19. Specific values of the various parameters adopted for computation of the wind loads and the code of practice followed.
- 7.50.20. The Live loads adopted for each floor.
- 7.50.21. Uniformly distributed and other dead loads adopted for each floor.
- 7.50.22. A description of partitions on each floor and the loading adopted to account for them.
- 7.50.23. Structural drawings shall bear the seal and signature of the consulting engineers.
- 7.50.24. Tests for construction materials
- 7.50.25. DHA may require the testing of any construction materials to determine if the materials are of the quality specified.
- 7.50.26. Tests of materials shall be carried out by an approved agency at the cost of the builder. Such tests shall be made as per the prevailing standards.
- 7.50.27. A complete record of tests of materials and their results shall be available for inspection during the progress of work.

7.51. Basement

- 7.51.1. For the construction of the basement beyond 12 ft (3.66 m) depth from road level, RCC piling along all four sides of the plot at the property line is mandatory. The design of RCC piling will be based on the soil investigation report and the design shall be submitted along with the building plans.

7.52. Residential Building Standards/ Requirements

- 7.52.1. **Structural Design Requirements** This section deals with normal double-storey houses in DHA. In special cases where an additional floor is available, the same structural design principles shall apply as framed in the sections below (Multi-Storey Buildings).
- 7.52.2. Materials
- 7.52.3. **Bricks:** They shall be of standard shape, burnt red, hand-formed or machine made and shall have a minimum crushing strength of 1500 psi and absorption up to 20%.
- 7.52.4. **Mortar:** Cement–sand mixes of 1:3 shall be adopted for a 4.5” thick wall and cement sand mortar 1:4 for a 9” thick wall.

- 7.52.5. **Plaster:** All plastering work will be in cement sand mortar (1:4) on inner and inter walls and the ceiling will be in cement sand mortar (1:3).
- 7.52.6. **Concrete:** The concrete used in various seismic bands shall have minimum compressive cylinder strength of 3000 psi at 28 days.
- 7.52.7. **Reinforcing Steel:** The reinforcing steel shall have minimum yield strength of 60,000 psi.
- 7.52.8. **Hollow Block:** Hollow block masonry is prohibited, but may only be allowed in a frame structure design.
- 7.52.9. **Foundation** Due to cut and fill areas RCC strips foundation minimum 9” thick should be provided under walls, Type of footings may be any of the following depending on the soil investigation report.
- 7.52.10. Strip footing. (It is recommended to place a footing beam beneath all load-bearing walls)
- 7.52.11. Raft footing.
- 7.52.12. Pile footing (Thickness of the pile cap should be a minimum of 15 inches).
- 7.52.13. Damp Proof Course
- 7.52.14. Proper damp-proofing shall be provided for walls and floors according to the standard specifications in the Uniform Building Code 1997 or International Building Code, 2006 of USA & NRM 1986.
- 7.52.15. In an area where the floor or the wall of the building is prone to seepage, that portion of the building below ground level shall be suitably waterproofed. Moreover, a water stopper shall be provided at every construction joint in the RCC basement wall and underground water tanks.
- 7.52.16. **Horizontal Reinforcement in Walls** The most important horizontal reinforcement is employing reinforcement concrete bands provided continuously through load-bearing longitudinal and transverse walls at the plinth and lintel according to the requirement stated below: -
- 7.52.17. **Plinth band** It shall be provided at the plinth level in all interior and exterior walls. (Not less than 9” depth).
- 7.52.18. **Lintel band** A lintel band (not less than 9” depth) shall be incorporated above all openings and shall be continuous in all interior and exterior walls. The reinforcement and band depth over the opening shall be provided in addition to any other requirement. The lintel of all the doors and windows shall be at the same level to facilitate the placing of this band all around and inside the building without any discontinuity on Ground Floor and First floor.
- 7.52.19. **Vertical Reinforcement** RCC column (not less than 9” x 9”) shall be provided at the critical section (i.e., corner of walls, junctions of walls) right from the foundation concrete to the top slab with minimum reinforcement/requirement and shall fulfil the seismic requirements. The concrete mix shall be kept to 1:2:4 by volume or by weight and shall have a strength of 3000 psi minimum.

7.53. Covered Area Standards

7.53.1. All residential houses shall conform to the following specifications/standards: -

Area of Plot(Sq fts)	Allowable Covered Area (G.F)	Allowable Covered Area (F.F)	COS / Setback			
			Front (ft)	Rear (ft)	Side* (ft)	Side (ft)
1125-1791 (5- 7.96 Marla)	85% (including car porch)	F.P of G.F Area	5	3	Nil	Nil
upto 1800(8 Marla)	85% (including car porch)	F.P of G.F Area	5	3	Nil	Nil

1809 to 2241(8.04-9.96Marla)	75% (including car porch)	F.P of G.F Area	7	3	3	Nil
2250 to 3591(10-15.96 Marla)	70% (including car porch)	After leaving COS 90% of GF	10	3	3	3
3600 to 5400 (16-24)	68% (including car porch)	including car porch area	15	5	5	5
5409 to 7200 (24.04-32 Marla)			18	5	5	5
7209 and above (32.04Marla)	60% (including car porch)	OR FP of GF area less car porch	20	5	5	5

7.53.2. Notes**7.53.3.** *Along car porch side.**7.53.4.** Front setback for one Kanal & above size plot can be relaxed upto 2 feet by paying charges as per DHA policy as mentioned in **Chapter-XIV****7.54. Odd-Shaped / Non-Standard Plot Rules****7.54.1.** The requirements of clear spaces shall be governed as stated below: -**7.54.2.** The open area is required to be left as clear spaces on each side are to be kept clear in totality instead of uniform space from the boundary wall.**7.54.3.** The permissible area to be covered shall be built, leaving the rest open.**7.54.4.** In the case of a non-standard plot, a permissible covered area proportionate to the plot size may be covered leaving the rest as open space on the sides.**7.54.5.** Porch size may be relaxed for a plot having a front more than a standard-size plot.**7.54.6.** In the case of a corner plot, if any member intends to keep the frontage on the longer side, the specified front clear space shall be left on both sides.**7.54.7.** Adjustment of COS will be decided case to case bases.**7.54.8.** The decision thus taken by the competent authority shall not be challenged or compared with other odd-shaped/non-standard plots.

7.55. General Conditions

- 7.55.1. Size of Rooms** The minimum area of a room meant for human habitation shall not be less than 80 sq ft.
- 7.55.2. No of Storeys** Maximum two storeys (ground + first) are permitted. The number of storeys will be counted from the reference street/road.
- 7.55.3. Sun Rooms** 1x room may be kept as sun room due to extreme weather conditions from dec to feb.
- 7.55.4. Height of the Building** The maximum height of the building including the water tank / mumty or any structure should not exceed 37 ft from the reference point. In exceptional cases where site permits increase in height maximum of upto one foot will be allowed after payment as per DHA applicable charges and approval from the Competent Authority.
- 7.55.5. Height of Floors** The minimum height of the floor should not be less than 8 feet 6 inches and the maximum height of the floor shall not be more than 16 feet, however, no additional floor will be allowed with the height of 16 feet and in no case, the building will be more than 2 stories from the reference point.
- 7.55.6.** Covered Area
- 7.55.7.** Shades shall not be counted in the covered area.
- 7.55.8.** In the case of the pergola, 25% of its area shall be counted for the calculation of the covered area. However, pergolas shall not be permitted within the set-backs / compulsory open spaces.
- 7.55.9.** The basement can be constructed 100% after leaving the COS.
- 7.55.10.** Structures such as fiberglass and steel structures would be taken in the covered area.
- 7.55.11.** It is mandatory for the members who intend to construct their house in DHA that min area of construction should not be less than 1,125 Sq ft. Neither the submission drawing will be approved nor will the construction be allowed if the area is less than 1,125 Sq ft.
- 7.55.12.** Calculation of Total Building Covered Area Covered area includes
- Area of the basement.
 - Ground and first-floor area.
 - Area of Porch.
 - Area of the verandah.
 - Mumty area.
- 7.55.13. Finish Floor Level** The finish floor / Plinth level of the ground floor should not be more than 4 ft 6 inches.

7.55.14. Construction in Split Level Due to variation in the level or encountering hard strata, wherein excavation becomes difficult, split-level with a maximum of 3 ft level difference may be allowed.

7.55.15. Set-back Level The level of setback should not be more than +2'-00". However setback level in front of the opening into the side setbacks can be raised upto +3'-6", with adequate arrangements for the privacy of the adjacent house. The said option can only be provided at one opening. More than one raised portion in setbacks will not be allowed. In the case of corner plots, the roadside setback may be adjusted as per the level of the adjacent road with prior approval of DHA.

7.55.16. Balcony Balcony of maximum 2 ft. width is allowed in the rear space of 7'-0" setback. For 5'-0" setback balcony/shade is 1'-6".

7.55.17. Car Porch

7.55.18. The maximum size of car porches vis-à-vis plot area is as under: -

Area of Plot(Sq fts)	Maximum Size including Side Setback
Above 7200 (32 Marla and Above)	32 ft x 35 ft 18 ft x 18 ft (2 nd Car Porch only for Corner Plots / Plotshaving openings on two roads)
3600 to 7200 (16 Marla to 32 Marla)	30 ft x 35 ft 18 ft x 18 ft (2 nd Car Porch only for Corner Plots / Plotshaving openings on two roads)
1809 to 3591 (8 to 16 Marla)	20 ft x 18 ft 12 ft x 18 ft (2 nd Car Porch only for Corner Plots / Plotshaving openings on two roads)
Upto 1800 (8 Marla)	14 ft x 18 ft 10 ft x 18 ft (2 nd Car Porch only for Corner Plot / Plotshaving openings on two roads)

7.55.1. The depth of the main porch can be relaxed up to 45 ft from the property line and the depth of 2nd porch (corner plots/plots opening on two roads) can be relaxed up to 30 ft from the property line on case-to-case basis considering the following: -

7.55.2. The depth and width of the plot shall not be less than 100 ft x 100 ft.

7.55.3. The layout of the street is such that permits the larger depth of the porch.

7.55.4. The privacy of the adjacent house is not compromised.

7.55.5. Max level of the main / 2nd porch shall be +2 ft (1 Ft -6 Inches) from the centre of the main / 2nd gate to the corresponding ref road crown. Moreover, the height of the ramp shall not be more than 1 ft 6 inches.

7.55.6. Two (2) car porches shall be allowed for corner plots, plots with two entries and non-corner plots having frontage 70 ft and above. One side car porch shall rest over the boundary wall.

7.55.7. The second car porch shall fall within the permissible projection/shade but with the side car porch columns resting over the boundary wall.

- 7.55.8.** The covered area of the porch(s) shall be counted in the total covered area irrespective of its size/shape etc. The allowable width of the shade of the porch shall not be counted in the covered area.
- 7.55.9.** The distance of the porch roof from the boundary wall may be allowed as 5 ft and porch columns should be kept 8 ft from the plot line.
- 7.55.10.** For plots having an area of 2250 sq fts and above, porch columns shall have a clear distance of at least 8 ft from the outer edge of the front boundary wall, however, projection of 3 ft wide towards the front only is allowed.
- 7.55.11.** For plots having an area less than 2250 sq fts, porch columns shall not extend beyond the front building line, however, projection from the porch column towards the front can extend upto 2 ft 6 inches.
- 7.55.12.** The larger size porches can be constructed after leaving the COS (Compulsory Open Space).
- 7.55.13.** Stormwater from the roof of the porch shall be drained within the plot.
- 7.55.14.** For 1800 & 1125 sq fts, porch columns shall not extend beyond the front building line, however, projection from the porch column towards the front only can be extended by 2 ft 6 inches.
- 7.55.15.** A high car porch is not allowed with columns resting over the boundary wall. They can however be permitted if kept clear of the COS.
- 7.55.16.** Construction above/below the porch (basement) is allowed after leaving compulsory open spaces.
- 7.55.17.** The gap above the boundary wall upto roof level between porch columns may be covered with inward louvres/lattice / solid wall.
- 7.55.18.** Design elements on a porch can be constructed upto the allowable width of the building shade.
- 7.55.19.** Only removable/foldable shade is allowed between the main gate and car porch to protect the cars during rain/hailstorms.
- 7.55.20.** The width of the porch will be calculated from the outer edge of the porch columns.
- 7.55.21.** If the porch column is separate from the main entrance of the house, then the distance between the podium column and boundary wall shall be minimum as per the front setback of the plot.
- 7.55.22. Basement** Basements may be allowed subject to the following:
- 7.55.23.** Setbacks shall be left clear.
- 7.55.24.** Member shall ensure implementation of approved excavation plan. Violation of same would be liable to fines as per DHA policy.
- 7.55.25.** In no case, the basement will be allowed in the minimum prescribed setbacks. Only a bridge of a maximum of 12 ft width shall be allowed to link the building with the approach road provided the front/ side yard of the plot is in a natural depression. The space under the bridge shall not be used for any habitable purpose, in any case.

- 7.55.26.** Only manual excavation is allowed in the basement near the DHA service/utilities areas and areas adjacent to already constructed buildings.
- 7.55.27.** The basement shall have to be completed in the given time frame.
- 7.55.28.** Member will have to obtain NOC (Anx Q) from neighboring building members if 5' space is not left from adjoining property. In case of damage to the adjacent building, the owner of the plot shall be solely responsible. In case the member fails to obtain NOC for the construction of the basement from neighbours, the member may be allowed to undertake such construction on submitting an affidavit (Anx R) that proper engineering technique shall be used to avoid any damage to neighbouring buildings and work will be executed under the supervision of qualified structure engineer and that DHA in no way shall be held responsible for such damages.
- 7.55.29.** Construction of the RCC retaining wall up to the plot line shall be mandatory.
- 7.55.30.** External walls below the natural ground level/yard level of the basement shall be minimum of 9" thick RCC walls, adequately waterproofing treated, structurally sound and stable against earth pressure etc.
- 7.55.31.** The basement shall not be exposed more than 4.5 ft. from the crown of the abutting road/zero level.
- 7.55.32.** The clear height of the basement shall not be less than 8'-6", and more than 10'- 6", unless site conditions force for extra heights. However, if the basement is used for habitable purposes, the rules for respective space uses shall be applied.
- 7.55.33.** All necessary precautionary measures shall be taken during the construction of the basement for the safety of adjacent structures. In case of damage to the adjacent property, the owner of the plot and his supervising engineer shall be jointly responsible for such damages and will make good of all such damages done. DHA management in no way shall be held responsible for such damages.
- 7.55.34.** If services, such as bath and kitchen etc. are provided in the basement, the owner must provide mechanical disposal from the basement to the upper level in all cases (irrespective of levels of DHA mains), so that there is no possibility of backflow in case of choking of the sewer lines. Management will not be responsible for the consequences in any case. Separate arrangements shall be made for the disposal of stormwater drainage to the DHA open road from the basement.
- 7.55.35.** In all basements, a minimum of one emergency exit of size 3' X 3' shall be provided with an outside opening.
- 7.55.36.** The basement may be used as a servant quarter subject to proper light, ventilation and other hygiene standards.
- 7.55.37.** In all cases, the building should look two-storied and the total height of the building from the front approach road shall not be more than 37 ft.
- 7.55.38.** Waterproofing/treatment is a must for basements.

7.55.39. Projection / Shade Sun shades are to be kept as under: -

7.55.40. In the front COS/set-back, not more than 3 ft for all size plots.

7.55.41. In the side COS/set-backs, not more than 2 ft 6 inches for plots equal to or larger than 3600 sq fts and 1 ft 6 inches for plots below 3600 sq fts.

7.55.42. Fiberglass coverage on the window top to avoid direct sun or rain will be allowed only till the width of the window. The depth of such projections should not be more than 2 ft 6 inches in side and rear COS/set-back and 3 ft in front COS/set-back for 3600 sq fts and above plots. For plots less than 3600 sq fts, the side shade width should not be more than 1 ft 6 inches.

7.55.43. No rooms shall be constructed on the projections/shades projecting beyond the building line.

7.55.44. Maximum fall of shades on rear/side should not be more than 1 ft including slab.

7.55.45. No projection beyond these limits whether permanent or temporary will be allowed in any COS/setback.

7.55.46. Design elements on the front/side shade (In case there is open space/nullah/road on that side) may be allowed on the first floor to the maximum allowable width of the shade. No design element is allowed on a side of the neighboring plot.

7.55.47. No other structure of any type is allowed in compulsory open spaces.

7.55.48. The maximum height of the parapet on the rear/side shades on the ground and first floor should not be more than 5 ft.

7.55.49. Shade / Projection of Mumty As per shades/projections of the building.

7.55.50. Parapet Wall Parapet wall maximum upto 5 ft and minimum upto 2 ft 6 inches height may be allowed. However, the height of the parapet wall at the front and side (If there is open space/nullah/road on that side) can be kept less than 2 ft 6 inches for design purposes only, provided that a specific area of the roof should be unapproachable in normal conditions.

7.55.51. Main Stairs Every building shall have a clear width of steps of stairs not less than 3 ft, with the riser maximum upto 7.6 inches and the tread minimum upto 10 inches.

7.55.52. Open Stairs Case

7.55.53. The plots having rear COS/setback of 5 ft and more can have straight/spiral steel stair / in rear setback after leaving a clear distance of 2 ft 6 inches from the rear plot line. The spiral stair should be properly screened to ensure the privacy of adjacent houses.

7.55.54. Open stairs are not allowed inside setbacks.

7.55.55. If extra land is 7 ft or more on the rear side, then steel spiral stairs will be allowed in the rear COS/setback only. The steel spiral stairs shall be placed in such a way as to touch the building line with a min 2 ft 6 inches clear space from the boundary wall to the edge of the spiral stair.

7.55.56. The straight steel stair shall be allowed only from the ground to the first floor.

7.55.57. Mumty is not allowed over open stairs.

7.55.58. The servant staircase should be covered with louvres.

7.55.59. All staircases shall be metal/steel.

7.55.60. **Provision of Lift for Residential Plots** Lift will be allowed in all types of Residential Buildings subject to the following: -

7.55.61. The max height of the lift well shall not be more than 14 ft from the roof level if the lift is up to the roof level.

7.55.62. The max height of the machine room shall not be more than 5 ft if the lift is up to the first-floor level.

7.55.63. The overall height of the lift well shall not be more than 38 ft from the reference point.

7.55.64. The covered area of the lift shall be counted in the total covered area of mumty.

7.55.65. In case the lift is going up to the roof, then the plinth level and floor height should be adjusted in such a way that the overall height of the building including the lift well shall not exceed 38 ft from the reference point. The overall height of the building (37 ft) has no linkage with the height of the lift well.

7.55.66. Lifts shall conform to international standards concerning all safety specifications including the installation of safety devices.

7.56. Mumty

7.56.1. Mumty conforming following specifications/conditions are allowed and may be used for storage/habitation with toilet whereas window(s) towards neighboring plot/house other than staircase is/are not allowed: -

7.56.2. **Location** Mumty can be constructed over the primary (main) or secondary staircase (within the building line).

7.56.3. **Width** The maximum width of mumty including the design element shall not be more than half the average width of the plot.

7.56.4. **Height** The height of mumty including the design element shall not be more than 11 ft from the top of the 1st-floor roof slab. An additional 1 ft increase in height of mumty (maximum upto 12 ft), may be allowed on payment of regularization fee as per DHA applicable charges.

7.56.5. If the lift machine room is constructed within the mumty area, then the parapet wall height of the mumty could be allowed to be raised enough to aesthetically merge the raised roof level of the lift machine room with the mumty and balance the overall look.

7.56.6. Covered Area for Mumty The covered area of mumty vis-à-vis area of under mentioned plot may be allowed as shown in front of each, whereas for plot having area in-between under- mentioned area, covered area of mumty will be calculated applying %age of lower side plot area:

Area of Plot (Sq fts)	% Age	Covered Area of Mumty (Sq Ft)
1125 (5 Marla)	20	225
1800 (8 Marla)	13.5	245
2250 (10 Marla)	11	250
2700 (12 Marla)	11	300
3600 (16 Marla)	11	400
4500 (20 Marla)	9	405
5400 (24 Marla)	9	486
7200 (32 Marla)	9	648
9000 (40 Marla)	9	810

7.56.7. The machine room for the lift/elevator and design element will be part of mumty and its covered area will be included in the covered area of mumty.

7.56.8. Structure(s) including raised solar panel(s) or geyser(s) on the roof of mumty is/are not allowed.

7.57. Area of Servant Quarter.

7.57.1. The area of the servant quarter excluding the toilet should not be less than 80 sq ft.

7.57.2. The sill level of servant quarter windows/ventilators shall not be less than 5 ft.

7.57.3. If the sill level is less than 5 ft, the pardah wall minimum upto 7 ft height in front of the servant terrace/doors/windows should be constructed with a non-see-through material such as fiberglass/steel but not in brick or RCC.

7.58. Ramp (Driveway) in Services Area

7.58.1. A ramp in front of the gate in the services area can be constructed subject to the following conditions and specifications: -

7.58.2. For laying/rectifications of faults / re-laying of services including electricity, telephone, cables, gas, water supply etc four (4) beneath ramp minimum 6 inches dia independent conduits will be provided by the member.

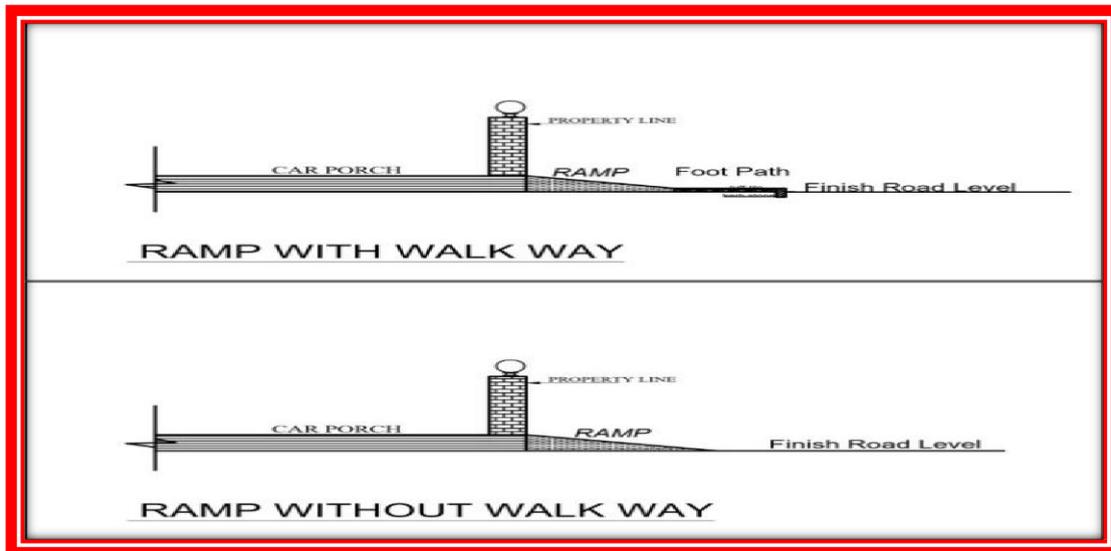

7.58.3. The ramp at the start of the property/plot line should be a maximum of 18 inches high and its height will be taken from the intersection of the plot centre line & reference road crown. The profile/slope of the ramp should be as under: -

7.58.4. Where the footpath does not exist, the ramp from the property/plot line (gate) may be extended maximum upto the outer edge of stormwater drain kerb stone along the road.

7.58.5. Where the footpath exists, the ramp from the property/plot line (gate) may be extended maximum upto the home-side (outer) edge of the footpath/kerb stone.

7.58.6. Constructed beyond the above-mentioned limits shall be demolished.

7.58.7. The pattern of footpath tiles in front of the ramp will not be changed.

7.58.8. Note

7.58.9. The ramp shall start from the edging stone of the walkways and the walkways shall not be disturbed in any case. The height of the porch shall be calculated from the centre of the ramp/driveway width and the edge of the pavement.

7.58.10. **Drain under Gate** A water channel of 4 inches x 4 inches would be constructed along the main gate line. This drain would be suitably connected to the overflow manhole of the septic tank through a 1-inch dia pipe. Steel grating shall be provided to cover it.

7.59. Services Area in front of Plots

7.59.1. The member can develop the service area in front of his plot (a property of DHA) as a green area by confining it with an edging of a maximum of 4 inches. The service area will be developed as per the slope of the road in front of the plot/house.

7.59.2. Fencing/grills around the service area are not allowed. Growing flower plants/ shrubs up to 3 ft in height is allowed except for corner-on-road junctions.

7.59.3. A planter or any other structure outside the property line will not be allowed.

7.60. Entry Gate(s)

7.60.1. The standard width of the main gate including the wicket gate and excluding pillars will be upto 20 ft and for corner plots width of the 2nd gate is upto 14 ft. The width of gate pillars (inclusive of the boundary wall) should not be more than 1 ft 6 inches, however, the width of the main gate may be increased upto 27 ft and the width of 2nd gate can be increased up to 16 ft after payment of regularization fee as mentioned in the fines. But services such as transformer, DB, pole etc falling in front of increased width will not be shifted. Increased width of the gate if found in inches will be rounded off and taken as a whole number (in feet) on the higher side.

- 7.60.2.** Provision of any type of arch/design element over the gate(s) is not allowed.
- 7.60.3.** Wicket gate upto 3 ft wide in extra land having an opening on road is allowed conditionally by Town Planning and Building Control Directorate that services such as transformer, DB, pole etc falling in front of the second entry/gate will not be shifted. The gate size can be increased maximum of upto 14 ft by paying charges as per DHA policy as mentioned in Chapter-XIV. In addition, charges for gates opening on two roads OR having frontage more than 70 ft will also be applied. A maximum of two gates including for extra land will be allowed.
- 7.60.4.** Design Element over Wicket Gates
- 7.60.5.** The design element will only be permitted over the wicket gate (4 ft wide). However, the height will not exceed 10 ft from the reference point. The width of the design element shall not be more than 1 ft 6 inches and the distance of the porch shade to the property line shall not be less than 6 ft 6 inches. In no case, the design element over the gate will exceed beyond the property line.
- 7.60.6.** The reference point shall be the intersection of the plot centre line and the ref road crown.

7.61. Boundary Wall

- 7.61.1.** Every Member will have to construct his own boundary wall. The boundary wall constructed should be safe and sound as per engineering practice.
- 7.61.2.** Both neighbors shall have full right to use it on their respective sides/top. However, no space from the right of way of the road/street shall be utilized for this purpose.
- 7.61.3.** The maximum height of the rear boundary wall should be 6 ft above the level of the rear road.
- 7.61.4.** The maximum height of the boundary wall shall not be more than 7 ft 6 inches at any point from the centre line of the adjacent road.
- 7.61.5.** The minimum height of the boundary wall should be 5 ft – 6 inches from the COS/setback level or as such to ensure the privacy of the adjacent plot/house. (Undertaking at **Anx S**)
- 7.61.6.** The boundary wall should be an RCC or brick masonry wall.
- 7.61.7.** The front/side boundary wall (If there is open space/nullah/road on that side) may be constructed with the grill or any other see-through material.
- 7.61.8.** A safety grill upto 2 ft 6 inches can be provided above the boundary wall.
- 7.61.9.** The electric fence can be installed over the boundary wall instead of the safety grill after formal approval on undertaking at **Anx T**.
- 7.61.10.** If two adjacent plots are owned by a single owner or different owners having blood relation (parents & their children, brothers and sisters or husband and wife) then the boundary wall between the two plots can be exempted/omitted subject to providing an application to DHA by the owners (jointly) on Judicial Stamp Paper.

7.61.11. If there is an existing house(s) on the higher side with a level difference of 5 ft or more then the boundary wall (RCC) shall be completed within 15 days from the date of commencement of excavation. The excavation scheme along with the supervision certificate is mandatory for the structure engineer.

7.61.12. Boundary walls should be completed in all respect before applying for the Completion Certificate. Plastering from inside and outside is mandatory.

7.62. Chamfering of Corner

7.62.1. For smooth flow of traffic at turning, the corner of a plot bounded by two roads shall be tapered/chamfered by a standard i.e 6 ft x 6 ft on either side from the corner for plots more than 1800 sq fts and 4 ft x 4 ft for plots up to 1800 sq fts. No chamfering is required in the case of commercial plots.

7.63. Retaining Walls

7.63.1. Construction of retaining walls within the plot boundary to retain the surrounding buildings, infrastructure, roads etc. will be the responsibility of the plot owner. DHA will not construct such retention structures.

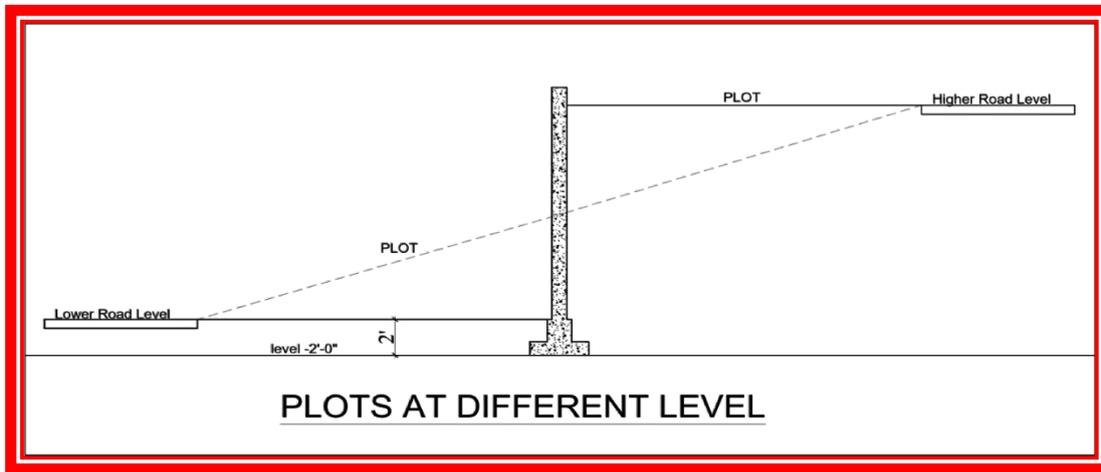

7.64. Two Adjacent Plots at Different Levels

7.64.1. Case-I (Two back-to-back plots with a level difference of 5 ft or more and construction on a lower plot)

If the house is constructed on the lower side first then the member will have to construct an RCC wall and the top of the RCC wall should be up to the retaining portion / rear road level to ensure the safety of the house. The structure stability certificate by the Structure Engineer and affidavit by the member is mandatory stating that the structure is safe and as per site requirement, and in case of any damage the owner/Structure Engineer will be responsible and the member will not claim any damage from DHA. This retaining wall is only for the safety of his own house and any adjacent member will have no right to the constructed wall.

7.64.2. Case-II (Two back-to-back plots with a level difference of 5 ft or more and construction on higher plot)

If the house is constructed on the upper side then its foundation shall start 2 ft below the level of the lower road and its top shall be up to the retaining portion. The structure stability certificate by the Structure Engineer and affidavit by the member is mandatory stating that the structure is safe and as per site requirement, and in case of any damage the owner /structure engineer will be responsible and the member will not claim any damage from DHA. This retaining wall should be only for the safety of the upper house and members of the house on the lower side will have no right on this wall and he will have to ensure the safety of his own house by constructing the type of structure as designed/recommended by his structure engineer based on site conditions and approved by DHA. This retaining wall is only for the safety of his own house and any adjacent member will have no right on the constructed wall.

7.64.3. Case-III (Two adjacent plots with a level difference between the ref point of two plots is such that compel the construction of RCC wall for plot on higher side) If two adjacent plots are at different levels and level differences compel the construction of the retaining wall then the RCC wall shall be constructed and the base level of the RCC wall should be 2 ft below the ref point of the plot on the lower side and after approval of DHA. The structure stability certificate by the Structure Engineer and affidavit by the member is mandatory stating that the structure is safe and as per site requirement, and in case of any damage the owner/structure engineer will be responsible and the member will not claim any damage from DHA. This retaining wall is only for the safety of his own house and any adjacent member will have no right on the constructed wall.

7.64.4. Case-IV (Two adjacent plots with a level difference between the ref point of two plots is such that compel the construction of RCC wall for plot on lower side) If two adjacent plots are at different levels and level differences compel the construction of a retaining wall. Then RCC wall shall be constructed and the top level of the RCC wall should be up to the ref level of the plot on higher side and after approval of DHA. The structure stability certificate by the Structure Engineer and affidavit by the member is mandatory stating that the structure is safe and as per site requirement, and in case of any damage the owner/structure engineer will be responsible and the member will not claim any damage from DHA. This retaining wall is only for the safety of his own house and any adjacent member will have no right on the constructed wall.

7.65. Plots Having Opening on Two Roads

7.65.1. Case- I: Plot has opening on two roads with level difference from 10 ft to 16 ft. (Ref is on higher road and rear road 10 ft to 16 ft down) If a plot has an opening on two roads and the level difference between the two roads is from 10 ft to 16 ft then the member may be allowed to construct 1x floor from the lower road level (which will be a basement from the reference road) but max allowable covered area shall be as per standard plot allowable covered area i.e 9019 Sq ft including mumty for 1 Kanal plots and for other sizes of plots area will be calculated as per applicable Byelaws. In such cases, the mumty should be planned towards ref road (higher side) to minimize the look of no of storeys.

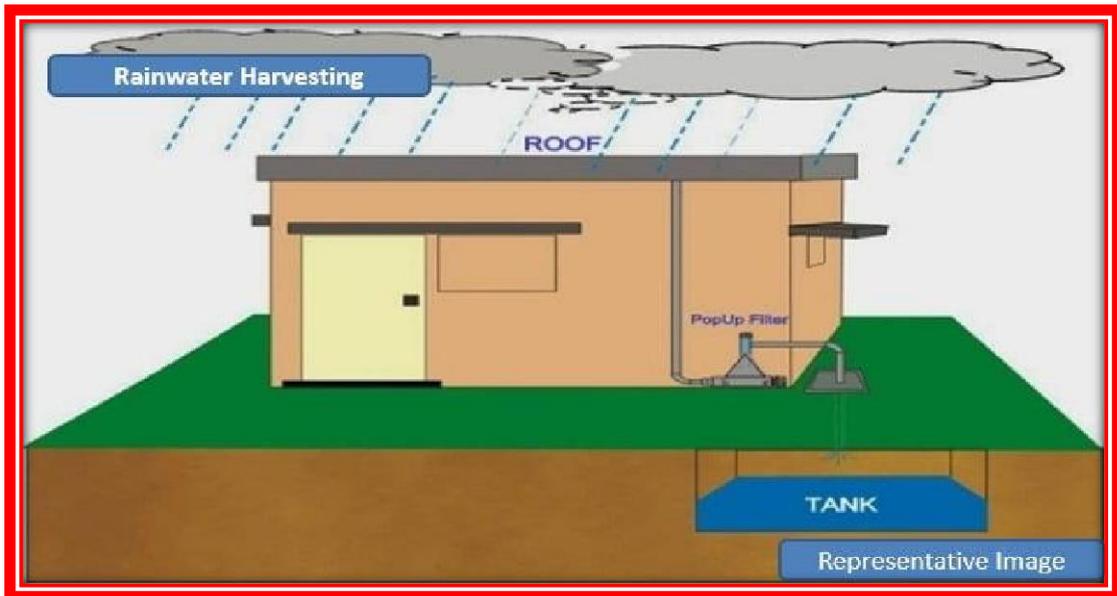

- 7.65.2.** Case-II: Plot have opening on two roads with level difference from 17 ft to 25 ft. (Ref is on higher road and rear road 17 ft to 25 ft down) If a plot has an opening on two roads and the level difference between two roads is from 17 ft to 25 ft, then the member will be allowed to construct 2 x floors (these will be 2 x basements from ref road) but max allowable covered area shall be as per standard plot allowable covered area e.g 9019 Sq ft including mumty for one Kanal plots and for the other sizes of plots, the area will be calculated as per applicable Byelaws. The rear COS/setback in such cases shall not be less than 10 ft for 2x basements and ground floor and not less than 20 ft for the first floor. The front COS/setback shall be as per DHA Byelaws. In such cases, the mumty should be planned towards the reference street (higher side) to minimize the look of the number of storeys.
- 7.65.3.** For plots with a level difference of more than 25 ft and the reference road is on the higher side, the no of storeys, setbacks, height, covered area etc will be decided on a case-to-case basis considering the layout of the street and other town planning / architectural parameters.

7.66. Water Tanks

- 7.66.1.** Under Ground Water Tank
- 7.66.2.** Maximum size of water tank 1,500 gallons for plots upto one Kanal.
- 7.66.3.** Maximum size of water tank 2,000 gallons for more than one Kanal.
- 7.66.4.** Only one underground water tank is allowed.
- 7.66.5.** The minimum distance of the underground water tank shall be 3 ft from the front boundary wall and 2 inches from the adjacent plot/house. The underground tank shall be located in such a way that water bowser filling this water tank may be facilitated from the outside.
- 7.66.6.** The underground water tank shall be constructed of RCC.
- 7.66.7.** The underground tank shall be waterproof and in case of leakage/seepage, the member will be responsible for any kind of damage to the adjacent house/houses and will reinstate the damages as per the decision of DHA. The services shall be disconnected in case of any non-compliance with DHA instructions.
- 7.66.8.** Over Head Water Tank
- 7.66.9.** The maximum size of the water tank is 900 gallons for plots upto one Kanal.
- 7.66.10.** Maximum size of water tank 1,200 gallons for more than one Kanal.
- 7.66.11.** The height of the water tank may be allowed upto 8 ft from the rooftop level.
- 7.66.12.** Only one overhead water tank (permanent/temporary) will be allowed. However internal partitioning of the tank is allowed (temporary in case of partial completion).
- 7.66.13.** The tank should be constructed in RCC and be waterproof.

7.66.14. Septic Tank Septic tank should be constructed with their own RCC walls and should have a minimum distance of 3 ft from the front boundary wall and 2 ft from the adjacent house/plot. Any other boundary wall should not be used for the construction of septic tanks.

7.66.15. Rain Water Harvesting Tank The RCC 'Rain Water' harvesting tank is mandatory for plots of 10 Marla & above. The harvesting tank shall be constructed in front COS/setback only after leaving at least 2 ft from the adjacent plot/house and 3 ft from the front boundary wall (for plots having a front COS/setback of 10 ft or more). The tank shall be waterproof and treated, "safe and sound". The layout of the rainwater harvesting tank along with the x-section shall be shown in the submission drawing.

Sizes of Rain Water Tanks are as follows:

Sr. No	Plot Size	Tank Size
1.	5 & 8 Marla	If space permits
2.	10 Marla	If space permits
3.	1 Kanal	1200 gallon
4.	2 Kanal	1800 gallon

7.66.1. Additional Small OHT Construction of an additional small overhead tank may be allowed if the member agrees to connect rainwater to the water tanks of commodes in the house and it shall not be more than ¼ size of the original OHT. The layout of the additional small overhead tank along with the x-section shall be shown in the submission drawing.

7.66.1. Pools

7.66.2. Swimming and decorative pools and fountains may be allowed after approval from the Competent Authority. However, the privacy of the adjacent houses should be ensured. In no case, the pool should be visible from the outside.

7.66.3. Necessary preventive measures will be taken for the waterproof treatment of pools to ensure the prevention of seepage/leakage into foundations, especially to avoid affecting neighbours/adjacent structures.

7.66.4. Indoor swimming pools will be encouraged.

7.66.5. In the case of a swimming pool, DHA will not responsible for the supply of water.

7.67. Installation of Solar Panels

7.67.1. The maximum capacity of the solar system shall be as under:-

Kanal house	<W
ouse & above	<W

7.67.2. The solar panels can be installed on the rooftop by keeping the lower edge at 5 ft and the upper edge max up to 10 ft.

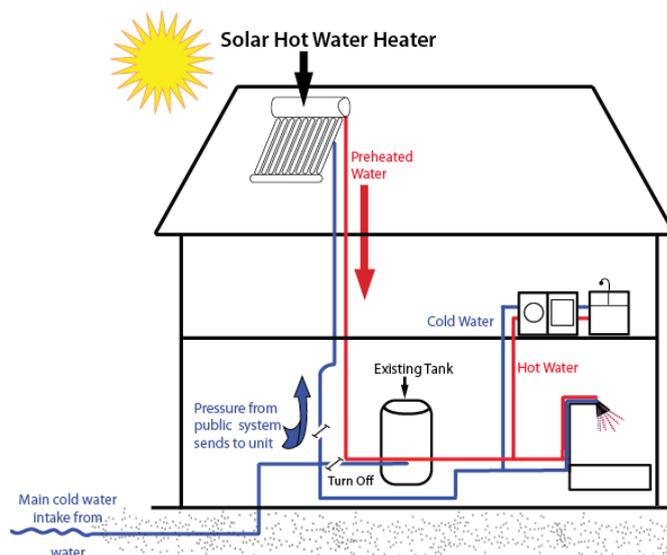

7.67.3. In exceptional circumstances where the roof space is insufficient to accommodate the required no of solar panels, the solar panels can be allowed on mumty / O.H.W.T by keeping the lower edge at 0 ft and the upper edge maximum up to one foot (12 Inches) after fully utilizing the effective space of roof. No further relaxation will be granted in height of panels.

7.67.4. The layout of solar panels along with the X-section showing the height of the lower edge and upper edge of solar panels shall be shown in the submission drawing. The layout of the mumty

7.67.5. / lift-well will be done with the orientation of the sun/direction of the movement of the sun and its likely sun shade to be created along with its influence on the efficiency of installed solar panels.

- 7.67.6. The structure stability certificate is mandatory from the DHA enlisted vendors duly signed and stamped by stating that the solar panels installed are safe against force majeure (wind storms, earthquakes, lightning, etc) and in case of any damage/ mishap, vendor /owner will be held responsible.
- 7.67.7. Undertaking on judicial stamp paper by the owner that, the solar system installed is safe and sound and in case of any mishap, he will be responsible. Moreover, he will not use space under the solar panels for any kind of residential / storage purpose.
- 7.67.8. If a member desires to install a solar system, he/she must engage a DHA-registered vendor.
- 7.67.9. No 'permanent' structure is allowed for the installation of a solar system.
- 7.67.10. Solar Water Heaters (SWH) Building to have: -
- 7.67.11. Solar Water Heaters (SWH) with appropriate automatic electric/gas backup system is recommended.
- 7.67.12. For SWH, plastic materials will preferably be used, which are resistant to UV radiation and to the temperatures minimum 95°C. Insulate all hot water pipes connected to SWH preferably to reduce heat losses from hot water mains.
- 7.67.13. **Solar Water Heating System** For all new buildings and sports facilities, a solar water heating system is recommended to provide 75% of hot water requirements. Solar water heating installations be fitted with insulated storage tanks and pipes, sized and fitted in accordance with the solar panel manufacturer's requirements for each specific application. The supplementary heating system will be controlled so as to obtain maximum benefit from the solar heater before operating.

7.68. Pipe Duct

7.68.1. Pipe ducts upto 9 inches may be allowed in COS/set-back.

7.69. Washing Area in Rear Set-back

7.69.1. One temporary shade of 7 ft x 4 ft will be allowed at the rear compulsory open space (for laundry only).

7.70. Design Element in Setbacks

7.70.1. Design Element maximum of upto 9 inches will be allowed in front COS/setback and a maximum of upto 6 inches at windows only in sides / rear setbacks if plots are having an open area/nullah/road on that side.

7.71. Bay Windows

7.71.1. For plots equal to or more than 2250 sq fts, 1 x bay window having a maximum size of 10 ft x 2 ft 6 inch x

8 ft can be provided in front COS/set back at ground and 1st floor only. The area of the bay window will be calculated in the total covered area. For plots having an extra land of 10' or more, the bay window having a maximum size of 10 ft x 2 ft 6 inch x 8 ft can be provided on the ground floor only.

7.72. Features in COS/Setbacks

- 7.72.1. Rockery/water feature/flower pots upto the height of the boundary wall may be constructed with the front boundary wall. In case a rockery/water feature is provided along a common boundary wall, a minimum gap of 6 inches shall be provided between the wall and the rockery/water feature.
- 7.72.2. Rockery/water feature/flower pots in sides/rear clear open spaces may be allowed leaving a clear passage of 2 ft 6 inches between building & rockery/water feature and minimum 6 inches gap between common boundary wall & rockery/water feature.
- 7.72.3. In case of seepage at the boundary wall of the adjacent house due to the presence of rockery/water feature, the owner shall address the problem of seepage within 15 days from the issuance of notice from DHA, otherwise, it will be rectified at the defaulting owner's risk and cost.
- 7.72.4. Growing plants is not allowed inside/rear COS/setbacks, however, planters may be used as per Byelaws
- 7.72.5. The rear/side COS/set-backs shall be properly concreted / terrazzo / marbled.

7.73. Miscellaneous

- 7.73.1. Earthing pit should be constructed inside the plot boundary.
- 7.73.2. The maximum width of stairs in the side COS/setback leading to the ground floor only should not be more than half the width of the COS/setback.
- 7.73.3. In case of violation, charges will be calculated across the full length and not for a specific portion of the violation.
- 7.73.4. Development/protection of the plot (retaining wall etc) within the boundary line including extra land is the sole responsibility of the owner.
- 7.73.5. Construction of a boundary wall without the construction of the house and using it as a green area/plantation of trees or any other purpose is not allowed.
- 7.73.6. Changing the color of distribution boards, electric panels and electric poles etc. in the service area is not allowed.
- 7.73.7. No structure of any kind will be allowed on the roof except mumty, machine room/lift well and 1x OHWT.

7.74. Modern Construction Technology

- 7.74.1. DHA can allow the use of modern construction technologies like SCIP & modular construction provide the same are on internationally recognized standards, approved by national authorities like NESPAK, ERRA etc and duly evaluated by DHA technical team.

7.75. Commercial Building Standards/ Requirements

- 7.75.1. **Commercial Building Standards.** Commercial plots shall observe the following standards: -

Area of Plot Sq fts	Foot Print	Arcadee at GF	COS (Width in ft)		
			Front(ft)	Rear(ft)	Sides(ft)

Upto 900 (4 Marla)	100%	-	-	-	-
909 to 2250 (4 to 10 Marla)	100%	-	-	-	-
2259 to 3600 (10 to 16 Marla)	90%	6 ft	-	7 ft 6 inches	-
3609 to 5400 (16 to 24 Marla)	GF = 85% Above GF = 75%	6 ft	-	7 ft 6 inches	5 ft @
Above 18000 (4 Kanal)	Will be decided by the Competent Authority				
<p>@Note: One side.</p> <p>a. Smaller plots amalgamated into one larger plot up to 3600 sq fts will follow the Byelaws of the smaller plot.</p> <p>b. In case a commercial plot falls in a residential area, then COS/setbacks and the building height of the residential area will be followed.</p> <p>c. By laws of larger plots should vary case to case as decided by the Authority of DHA.</p>					

7.76. General Conditions for Commercials

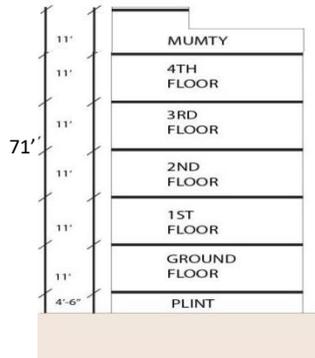

- 7.76.1. Reference Point** The reference point shall be the intersection of the building centre line & reference road crown.
- 7.76.2. Finish Floor Level** The finish floor / Plinth level of the ground floor should not be more than 4 ft 6 inches.
- 7.76.3. Arcade** Commercial plots upto 2250 sq fts can be constructed with or without an arcade.
- 7.76.4. Entrance Steps** Entrance steps can be provided upto 3 ft outside the plot line, however, when making ramp for disabled persons, same may be allowed upto 4ft.
- 7.76.5. Septic Tank** A septic tank of size 5 ft x 3 ft x 5 ft can be constructed adjacent to the entrance stairs in the parking area. Maintaining the Septic Tank and keeping it clean and workable is the responsibility of the plot owner.
- 7.76.6. Height of Floor and Area of Shops** The height of the floor should not be less than 8 feet 6 inches. The minimum area of the shop should not be less than 100 Sq ft.
- 7.76.7. Basement** Basement is allowed to all members irrespective of the topography of plots but with the following conditions: -
- 7.76.8.** In the case of adjacent constructed plazas, the member will have to submit an affidavit (Anx R). Moreover, proper engineering techniques shall be used to avoid any damage including repair/reconstruction of all damages caused to neighboring buildings and work will be executed under the supervision of a qualified structure engineer. However, DHA in no way shall be held responsible for such damages.
- 7.76.9.** The basement shall not be exposed more than 4 ft 6 inches from the crown of the abutting road / zero level.
- 7.76.10.** The clear height of the basement shall not be less than 8 ft 6 inches.
- 7.76.11.** Basement wall / retaining wall (RCC as per structural drawings) adjacent to completed plazas endangering neighboring structures should be completed within 15 days from the date of commencement of excavation.
- 7.76.12.** If services, such as bath and kitchen etc, are provided in the basement, the owner must provide mechanical disposal from the basement to the upper level in all cases (irrespective of levels of DHA mains),

so that there is no possibility of backflow in case of chocking of the sewer lines. DHA will not be responsible for the consequences in any case.

7.76.13. The cost of additional services work shall be borne by the member.

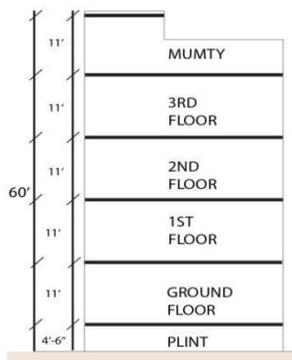

7.77. Height of Commercial Building

7.77.1. Main Commercial Max height of the main commercial shall not be more than 71 ft from the reference point, including the water tank & mumty.

Main Commercial

7.77.2. Sector Commercial Max height of the sector commercial shall not be more than 60 ft from the reference point, including the water tank & mumty.

Sector Commercial

7.77.3. For Larger Commercial Plots DHA will give separate approval depending on the nature of the commercial project.

7.78. Projection / Shade

7.78.1. Maximum 3 ft beyond plot line at front and rear (if site permits).

7.78.2. The Shade / Projection at the rear along with windows/ventilators will be allowed subject to the following;

-

7.78.3. There is a service corridor at the rear having a width of more than 8 ft.

7.78.4. There are commercial plots on both sides of the service corridor.

7.78.5. There is no residential area towards the rear (Behind or across the road).

7.79. Construction on Rear Shade (Commercial Plots).

7.79.1. The construction on the rear shade along with windows/ventilators will only be allowed if the Site Plan is issued as "Opening on two Roads".

7.79.2. Conversion of projections into a habitable area only at the front. However, the rear may be used for balconies only.

7.79.3. Corner plots or plots having openings on two roads would be allowed construction on shade at the front and side/rear provided that dues for corner/opening on two roads are paid. For plots which have openings on three sides, the construction on shade at 3 sides shall be allowed after paying double the charges for corner plots.

7.80. Stair Hall

7.80.1. The clear width of stairs shall not be less than 3 ft. The riser shall not be more than 7 inches and the tread shall not be less than 10 inches.

7.80.2. Not to be constructed with inflammable material.

7.80.3. All staircases should be of RCC.

7.80.4. Walls are to be made in RCC with fire-rated doors having a fire rating of 3 hours.

7.80.5. All stair halls have to be connected with the basement and the rooftop.

7.80.6. The minimum clear headroom under beams and stair landing shall be 7 ft.

7.81. Mumty

7.81.1. A maximum of upto 30% of the plot area can be utilized for mumty. The Mumty area may be used as a machine room, lift room, generator room, living area or bathroom. The maximum width of mumty shall not be more than half the average width of the plot.

7.82. Shops / Offices / Apartments Numbering

7.82.1. The shop/office/apartment number will be shown on the submission drawing for reference. The numbers will be in a clockwise direction following the suffixes B1, B2, G, F1, F2, F3, F4, F5 and so on e.g Shop/office/apartment number in the basement next to Ground Floor will be numbered as 1B1, for 2nd basement 1B2, shop/office number 1 on G.F will be named as 1G, shop/office/apartment number 1 on First Floor will be named as 1F1, for second floor 1F2 and so on.

7.83. Provision for Special Persons

7.83.1. Minimum one toilet for the handicapped equipped with special fixtures.

7.83.2. Minimum one lift in all commercial and public buildings, which can accommodate a wheelchair.

7.83.3. Every commercial building having an area of 4500 Sq ft or above shall have at least one access/exit for disabled persons, which shall be indicated with proper signage. The entrance shall be through a ramp (slope not more than 25 degrees with the non-slip surface) together with a stepped entry. If the floor of the building is more than two steps high or the riser of the step is equal to or more than 6 inches, the ramp thus provided shall start in line with the lowest steps but inside the property line.

7.83.4. Space for parking one car at road level near the main entrance with a maximum travel distance of 20 feet to the main entrance and one in the basement parking (if provided) for every 4500 Sq ft of area.

7.83.5. A handrail shall be provided with the ramp if the numbers of steps are more than four.

7.84. Toilets

7.84.1. Be provided in each commercial block.

7.84.2. Separate arrangement for ladies is mandatory. One Wheel Chair for the disabled is encouraged.

7.84.3. Cleaning and maintenance of the toilets is the responsibility of the owner.

7.85. Provision of Lift

7.85.1. Lifts / Escalators shall be provided in the building where the climb is more than four storeys (Ground Floor + 3) & shall conform to the latest technical provision.

7.85.2. The max height of the lift well shall not be more than 14 ft from the roof level if the lift is up to the roof level.

7.85.3. The max height of the machine room shall not be more than 5 ft if the lift is up to the first-floor level.

7.85.4. The overall height of the lift well shall not be more than 72 ft from the reference point for Main Commercial & 60 ft from the reference point for Sector Commercial.

7.85.5. The covered area of the lift shall be counted in the total covered area of mumty.

7.85.6. In case the lift is going up to the roof, then the plinth level and floor height should be adjusted in such a way that the overall height of the building, including the lift well, shall not exceed 72/60 ft from the reference point. The overall height of the building (72/60 ft) has no linkage with the height of the lift well.

7.86. Swimming Pool

7.86.1. No swimming pool can be provided for plots upto 5400 sq fts. For Plots more than 5400 sq fts the swimming pool can be constructed after the approval of DHA as a Competent Authority.

7.87. Installation of Antenna Tower & Lightening Conductor

7.87.1. Permission for the Installation of Antenna Tower & Lightening Conductor will be valid for one year, which may be renewed every year. The fee will be charged as per DHA policy of the area/floors for which the antenna tower is being used which may be reviewed as per DHA policy.

7.87.2. The position of the tower has to be incorporated into the design of the building the weight and placement have to be taken care of in the building structure.

7.87.3. Lightening Protection For all commercial buildings, lightning protection should be provided

7.88. Fire Safety and Security System

7.88.1. The width of the stair flight shall not be less than 3 ft 6 inches.

7.88.2. Stair hall shall have concrete walls.

7.88.3. Stair hall doors shall have a fire rating of 3 hours.

7.88.4. All buildings shall be equipped with a fire hose and GI / CI exposed pipes painted in red with firefighting wall cabinets on each floor. The length of the pipe should cover a whole floor area.

7.88.5. Fire extinguishers should also be provided on each floor.

7.88.6. A separate fire motor shall be installed in the basement.

7.88.7. Steel structures shall have a fire safety of 3 hours and ½ hour for non-structural members.

7.88.8. A state-of-the-art security system, approved by the Authority shall be mandatory for all buildings constructed in DHA.

7.89. Structures on Roof

- 7.89.1. Only the following structures of permanent nature may be constructed on roofs provided they are designed and built to the satisfaction of the Authority: -
- 7.89.2. Chimneys/air conditioning and other ducts, vents and wind catchers.
- 7.89.3. Suitably designed water tank.
- 7.89.4. Radio and television antenna post (after approval from DHA IT Directorate)
- 7.89.5. Parapet walls of 3 ft in height. In the case of an accessible roof, the provision of a railing parapet wall would be compulsory.
- 7.89.6. Staircase tower (mumty).
- 7.89.7. Lift rooms, Skylight etc.
- 7.89.8. Other structures, which the DHA may permit by general or specified order.
- 7.89.9. No mobile phone antennas and billboards are allowed on the roof of a house for residential plots, however, allowed for commercial subject to the approval from Authority.
- 7.89.10. Roofs may be provided with water proofing treatment along with insulation material for thermal efficiency of the building.

7.90. For Amenities and Commercial

- 7.90.1. On completion of construction and before the main electrical connection is provided to the building/house, the member shall submit a test report of the electrical system issued by a government / WAPDA-approved wiring Inspector.
- 7.90.2. An independent earth pit will be provided in the building/house. The earth resistance of the pit must be less than 5 ohms.

7.91. Inspection of Buildings

- 7.91.1. The following actions are required to be taken Town planning & Building Control Directorate to avoid property line violations/tilting etc of structure: -
- 7.91.2. Initial demarcation will be carried out by Town planning & Building Control Directorate.
- 7.91.3. Stage-wise inspection will be called by the member as per inspection chart milestones.
- 7.91.4. Inspection will be called by members on completion of the grey structure for any tilt/offset.
- 7.91.5. To avoid property line violations after initial demarcation Building Inspector/survey staff of the Town planning & Building Control Directorate will ensure property line violations if any.
- 7.91.6. In order to ensure that the approved structure design should be implemented at the site, the structure engineer who has designed the structure should supervise the work at the foundation / DPC level and every roof slab level till the completion of the structure and will submit a certificate accordingly at every stage. Work will only be allowed to proceed further on receipt of an "Approved Design Implementation Certificate" (ADIC) at every stage.
- 7.91.7. The final inspection will be done on the application for completion by the owner.

7.92. Emergency Stair Case

7.92.1. An emergency staircase is mandatory for plot 8 marla and above. However, in case of essential requirement of emergency staircase for plots below 8 marlas, the competent authority of DHA will be the sole authority to decide on a case-to-case basis.

7.93. Occupation

7.93.1. Any commercial unit like shops/offices/halls/apartments can be occupied after completing the front façade of the whole building and the floor to be occupied should be completed in all respect, after getting NOC from DHA. In case of occupation without permission, fines shall be imposed as per DHA policy. However, a completion certificate should be obtained within 3 years from the date of approval of the first submission drawing.

7.94. Partial Selling of Shops / Apartments / Offices

7.94.1. Partial selling of shops/ apartments (without lower and upper rights): -

7.94.2. The shop numbers should be properly marked in the submission/completion drawing as per the procedure laid down in DHA Byelaws.

7.94.3. The partial selling should be through DHA (Transfer & Record Office) after payment of prescribed dues.

7.94.4. In case of partial selling, 20% of the shops should be kept by the owner excluded mumty. However, the member can sell a whole plaza to a single owner. If the whole plaza is sold out, conditions of lower and upper rights shall be excluded.

7.94.5. All the responsibilities for the provision/maintenance of services such as Electricity, Sui Gas, Water, Telephone, Cable, Fire-fighting, Security, structural safety etc would be the sole responsibility of the owner of the plaza.

7.94.6. No goodwill / Pagri is allowed, failing which will result in heavy fines/disconnection of services.

7.94.7. In case of any structural change, prior approval from DHA is mandatory. However, the internal/soft partitioning can be done without approval.

7.95. Instructions for Shop Owners

7.95.1. Garbage shall not be thrown in front of houses/shops / public buildings. Shopkeepers shall place dustbins in front of their shops and place the garbage in the dustbin from where it shall be picked up by DHA (Administration Office).

7.95.2. In order to avoid inconvenience to the customers, air conditioners shall be installed at the height of 8 ft from the level of the veranda and proper arrangements shall be made for the drainage of water. Preferably split type of air conditioners may be installed.

7.96. Common Floor Usage – Commercial Plots

7.96.1. With specific permission, the member may be permitted to join floors of adjacent commercial plots/buildings for commercial benefit by removing their respective walls. Permission will be accorded by DHA with the following conditions: -

7.96.2. Joint Floor use by payment of Rs. 100,000/- per floor (or amount as per DHA prevailing policy) to be equally shared by both owners.

- 7.96.3. An undertaking (Anx U) on judicial stamp paper by both members for joint use of the floor.
- 7.96.4. Responsibility for removing the joint walls rests with the owners for the structural stability of the shops.
- 7.96.5. The utility bill will be paid individually by both owners.
- 7.96.6. Withdrawal of undertaking by any one of the partners will lead the automatic cancellation.
- 7.96.7. Upon cancellation of joint floor usage, both owners will be bound to construct their respective walls within a period of three months from the date of written notification to DHA for cancellation of joint floor use by either of the owners.

7.97. Solid Waste Management

- 7.97.1. Refuse chutes shall be provided in the multi-storey building for the disposal of solid waste.
- 7.97.2. All buildings other than houses shall provide adequate storage space for storing solid waste equal to at least 24 hours of generation.

7.98. Mega Commercial Buildings Standards

- 7.98.1. For each project, guidelines of Pakistan Building Codes and all relevant construction standards will be followed especially seismic zone (2B) of the Quetta region. Any exceptions/adjustments to these codes and guidelines will be evaluated case to case basis subject to detailed evaluations by an approved structural engineer and architect.

8. CHAPTER-VII

GUIDELINES DURING CONSTRUCTION

8.1. General Guidelines

- 8.1.1. For commencement of construction in DHA, steps as per **Anx D**.
- 8.1.2. Until the grant of formal possession to an owner for commencement of construction, DHA is the temporary custodian of all vacant plots and may utilize them, as and when required, as per the needs and requirements of the Authority.
- 8.1.3. The working hours for construction activities would be as under: -
- 8.1.4. upto 1900 hrs (7 pm) in winter.
- 8.1.5. upto 2100 hrs (9 pm) in summer.
- 8.1.6. Fixing of Green Cloth / CGI Sheets on Under Construction Sites / Houses
- 8.1.7. **Corner Plots** Member will install green cloth masking / CGI sheets as under: -

Ser	Location / Side	Details
7.1.7.1	Side House	Green cloth masking
7.1.7.2	Rear House	Green cloth masking
7.1.7.3	Road side	Green Colored CGI sheets (2 sheets on angle iron/pipes)
7.1.7.4	Front side	Green Colored CGI sheets (2 sheets on angle iron/pipes with gate)

- 8.1.8. **Non-Corner Plots** Member will install green cloth masking / Green Colored CGIsheets as under:

Ser	Location / Side	Details
7.1.8.1	Right house	Green cloth masking
7.1.8.2	Left house	Green cloth masking
7.1.8.3	Rear house	Green cloth masking
7.1.8.4	Front / Road side	Green Colored CGI sheets (2 sheets on angle iron/pipes with gate)

- 8.1.9. Construction material would be placed within the plot area or in the adjacent plot without tempering the plot and with the permission of the DHA Building Control Section.
- 8.1.10. Screen the whole site to stop dust from spreading. Cover piles of building materials like cement, sand and other powders, regularly inspect for spillages and locate them where they will not disturb the adjacent constructed houses.
- 8.1.11. The temporary store would be constructed within the plot or in the adjacent plot without tempering the plot and with the permission of the DHA Building Control Section.
- 8.1.12. No excavation works, whatsoever, will commence without first delivering the construction material (cement, steel, sand, crush, bricks etc) on site. The temporary store may be constructed before the start of excavation works.
- 8.1.13. Member shall ensure implementation of approved excavation plan. Violation of same would be liable to fines as per DHA policy.
- 8.1.14. During excavation for construction, any damage to adjacent buildings or services, the member will be fully responsible and will build it back and restore it to its original condition.

- 8.1.15.** Every person undertaking building work shall provide adequate readily accessible sanitary conveniences for all persons engaged in that work. The sanitary convenience provided shall be sited in such a position as not to create a nuisance or cause offence to persons, either in a public place or to persons residing or working in any premises adjacent to or near the site where building work is being undertaken. The sanitary convenience provided would be disposed-off to DHA sewer through a septic tank. No direct disposal of sewage to the main sewer would be allowed.
- 8.1.16.** In the case of an open basement, 2 feet excavation in the adjacent plot can be done with the permission of the owner / DHA Building Control Section provided the backfilling would be done with sand and the retaining wall would be constructed within 15 days from the commencement of excavation.
- 8.1.17.** Any dust produced as a result of construction must be kept to a minimum by damping it down with water. Stockpiles of materials must be kept damp to prevent windblown dust.
- 8.1.18.** Collect any waste/water generated from site activities in settlement tanks, screen, discharge the clean water and dispose-off the remaining sludge at an appropriate location.
- 8.1.19.** No burning of materials on site.
- 8.1.20.** Nobody would be allowed to wash any type of vehicle on the porch, on road or ramp outside the building. If anybody violates, fines would be imposed as per DHA policy.
- 8.1.21.** No noise-emitting equipment such as wood/steel cutting machines, marble cutters/grinders can be placed on the porch/lawn or outside the building.
- 8.1.22.** During the construction activities like cutting/grinding of marble, cutting of wood, steel etc, the outer openings such as doors, windows ventilators etc. will be covered with polythene sheets to avoid spreading of dust into the adjacent houses.
- 8.1.23.** Underground water tanks shall be covered/bounded by a 4 feet high safety grill/parapet during construction.
- 8.1.24.** Construction of the main building will not be allowed until the entire boundary wall towards the road upto DPC level is completed and checked by DHA.
- 8.1.25.** Debris shall not be allowed to accumulate to constitute a hazard to the community and environment.
- 8.1.26.** Contractor of the commercial project will be responsible to provide a board on-site during the currency of the project, with the following information
- 8.1.27.** Plot Address
- 8.1.28.** Name of the Architect & Structural Engineer with a telephone number.
- 8.1.29.** Name of the contractor with telephone number.
- 8.1.30.** Approved plan from DHA with approval reference number mentioned.
- 8.1.31.** Commercial projects to ensure all roads, sidewalks and thoroughfares bordering on or running through any excavation site shall be provided with substantial guard rails or board fences
- 8.1.32.** Commercial projects to provide fix and maintain suitable screens or awnings to screen the building and scaffold to effectively minimize dust and debris from falling or being blown over the boundaries.
- 8.1.33.** Commercial projects will ensure that during darkness, all public sidewalks shall be adequately illuminated and warning lights or flares shall be placed upon the property to ensure the safety of pedestrian and vehicular traffic.

- 8.1.34.** If the member violates the Byelaws and does not rectify or remove the violation as per the Byelaws, within the specified time frame, then all works on site will be halted and services may be disconnected till rectification of the violation.
- 8.1.35.** In case of non-compliance by a member after issuing the requisite number of notices, the rectification of the violation shall be done through DHA-registered vendors at the member's risk & cost. The cost will be deducted from the member's security money.
- 8.1.36.** Construction work will only be undertaken through a contractor registered with DHA. Member can self-construct his house after necessary permission from Security Directorate (Part-III, Clause 12.4)
- 8.1.37.** If seepage is observed, during construction, from an adjacent house, it should be immediately reported to Town planning & Building Control Directorate.
- 8.1.38.** Members/contractors remain responsible for the conduct of their employees/workers. Any employee found without a security pass or involved in undesirable activities will be immediately expelled and blacklisted by security staff, after giving the right to a hearing.
- 8.1.39.** All residents/employees are expected to cooperate with Building Control staff and adhere to the instructions/guidelines issued from time to time.
- 8.1.40.** DHA will not allow the commencement of any digging and related works, that can possibly pose a threat to the safety of neighboring structures or services, during the monsoon / rainy season. Similarly, DHA may halt those works whose continuation can be delayed due to the expected long absence of labor from the site as a result of gazetted holidays (Eid) or lockdown/strikes etc.
- 8.1.41.** In case of any error/doubt that can possibly lead to a construction violation, Town planning & Building Control Directorate should be approached for clarification and the particular construction be stopped till formal approval or clarification. Otherwise, DHA reserves the right to halt the work at the site, disconnect services and demolish the violation and/or impose heavy fines.

(PART-III)**9. CHAPTER-IX****ADMINISTRATION DIRECTORATE****ADMINISTRATION SECTION****9.1. Commercial Activity**

- 9.9.6. Wearing masks at all public places like offices, markets/plazas, schools, Masjids, banks and graveyards etc is mandatory. In case of violation, a penalty will be imposed as per DHA policy (Chapter XV).
- 9.9.7. Closure or reduction in staff in markets etc. as and when asked by National Command and Operation Centre (NCOC). In case of violation a penalty will be imposed as per DHA policy (Chapter XV).
- 9.9.8. Maintaining social distancing at all public places, especially at Masjids and markets. In case of violation, a penalty will be imposed as per DHA policy (Chapter XV).
- 9.9.9. Violations of the above instruction will be subjected to fines as per DHA Byelaws.
- 9.9.10. Polio / Measles Campaign
- 9.9.10.1. Residents are required to cooperate with Security staff / Government teams.
- 9.9.10.2. Refusal cases will be dealt with legally (FIR shall be lodged against refusal cases)

9.10. Medical Centre

- 9.10.1. Ambulance Service
- 9.10.1.1 Ambulances will be used only to evacuate seriously ill, bedridden or patients on wheelchairs.
- 9.10.1.2 On receiving a call from the resident, Ambulance will move on the order of the Medical Officer

only. The Nursing Assistant will write the complete address/details of the caller/patient (Rank, name, cell no, disease, purpose /destination).

- 9.10.1.3 In case of heart patients or serious road accidents preferably 1x Nursing Assistant will be marked to accompany the patient.
- 9.10.1.4 An ambulance will move immediately to the nearest hospital and report back to the medical centre.
- 9.10.1.5 Initial charges will be Rs. 500/-, subsequently Rs. 20/- per Km.
- 9.10.1.6 Army persons will be evacuated to CMH/MH/AFIC or the nearest civ hosp.
- 9.10.1.7 Ambulances will not be used for the transportation of Corona patients and dead bodies.
- 9.10.1.8 The ambulance request form is available at DHA Clinics.

9.10.2. Oxygen Cylinder

- 9.10.2.1 Oxygen Cylinder will be used under medical advice and supervision of Medical Officers / trained staff
- 9.10.2.2 The oxygen cylinder will be used for serious patients in the medical centre only and other emergencies as directed by MOIC
- 9.10.2.3 The oxygen cylinder will not be used for corona patients because the mask and flow meter are likely to get contaminated with the virus
- 9.10.2.4 Oxygen cylinders being highly inflammable will not be given to residents for home use
- 9.10.2.5 The oxygen cylinder in the ambulance is the responsibility of Nursing on duty
- 9.10.2.6 MOIC and MOs shall be responsible to ensure the judicious use

9.11. Grave Yard

9.11.1. Eligibility for Burial is as under: -

- 9.11.1.1 The resident of DHA having own residential property in any of the phases. Member having only plot shall not be eligible.
- 9.11.1.2 Spouse of the resident.
- 9.11.1.3 Children (including legally adopted children) of the resident.
- 9.11.1.4 Dependent parents and grandparents of the resident or his / her spouse, if living with him/her.
- 9.11.1.5 Dependent children and daughter-in-law of the resident. This includes married/divorced daughters living with parents as a dependent.
- 9.11.1.6 Dependent grandchildren of the resident living with him/her. This includes the children of the owner as well as the dependent children of the son/widow / divorced/separated daughter if any residing with the owner.
- 9.11.1.7 Unmarried sisters are dependent on the owner of the house and live with him/her.
- 9.11.1.8 Tenant and his / her dependent family members (as applicable to resident) living in DHA.

9.12. Graveyard Bus

- 9.12.1. To facilitate the funeral of residents, a Graveyard Bus (w/o AC) is available in MT Sec round the clock which is provided to residents on the intimation of the Adm Directorate. Charges of Graveyard Bus are Rs. 2,000/- against each funeral which will be deposited in the DHA acct on the same day of duty.

9.13. Utilization of Vacant Plots

9.13.1. Vacant plots / open areas cannot be used for any plantation/functions/gatherings except funeral gatherings. In case of violation, a penalty will be imposed as per DHA policy (Chapter XV).

10. CHAPTER-X**SERVICES / MAINTENANCE / DEVELOPMENT****10.1. Services**

10.1.1. DHA is responsible to extend all services to the site/plot (including water supply, sui gas and telephone lines etc), however, the members are required to plan the distribution of these services within their own building accordingly. Further extension of the services to other users is strictly disallowed. Defaulting members are liable to disconnection of services and financial penalties. Any loss/damage occurred due to any malfunctioning of these services works, the member will be personally responsible and shall not claim any compensation from DHA.

10.2. Electric Meters

10.2.1. A maximum of two electric meters will be provided for each plot.

10.3. Water Supply

10.3.1. Application for water connection shall be made on the prescribed form to the DHA.

10.3.2. No person is permitted to install a motor/pump on the water supply line. Only one connection shall be provided for each building.

10.3.3. Construction of underground and overhead water tanks is mandatory.

10.3.4. Boring of any type for the purpose of water, sewerage, drainage etc is strictly prohibited in the territory of DHA except where found necessary.

10.4. Water Supply through Bowers (For Residents)

10.4.1. In case of extra water demand where tap water is available, bowser will be provided on payment, which will be recovered from residents through monthly utility bills.

10.4.2. In case of disruption in tap water supply, water through bowser will be provided free of cost (one water bowser/day) on instructions of complaint offices. Water on demand for under- construction houses will be provided free of cost.

10.4.3. Residential

10.4.4. No water point/tap will be left outside the boundary wall.

10.4.5. Construction of an underground water tank is mandatory but not on the slope side and be so located/designed that bowser filling is facilitated.

10.4.6. Members found violating the instructions on water supply will be asked to pay violation charges as per DHA policy.

10.4.7. Washing of vehicles on the road, on the ramp or the porch is not allowed.

10.4.8. The flow of water through the porch on the road is not allowed.

10.4.9. Commercial

10.4.10. Separate water connection for all owners of flats in the commercial building.

10.4.11. Overhead water tank must consist of two portions, one for firefighting and the other for storage purposes.

10.4.12. GI pipe of 2.5 inches in diameter should run from the top to the basement.

10.4.13. No structure or activity will fall outside the property line. Any sort of encroachment outside the property

line is strictly prohibited.

10.4.14. Where the park is planned in the rear or on the side of the allotted plot, the owner is not allowed to provide any opening in the building towards it, even a pedestrian way in the park, being a public property.

10.4.15. Members to ensure a clean environment in front/ around the property.

10.5. Sewerage / Manhole

10.5.1. Byelaws regarding house connection to the main sewer are as under: -

10.5.2. WC discharge is to be connected with the DHA manhole through the septic tank.

10.5.3. Washroom and kitchen drainage be connected directly to the overflow manhole of the septic tank. It shall not be connected to the septic tank.

10.5.4. Rainwater/stormwater be disposed-off in open drains or on the adjacent roads as per the design of the said Phase. It should not be connected to the sewer lines.

10.5.5. Members are required to construct septic tanks (only RCC construction).

10.5.6. Members are required to get their septic tanks inspected before covering their tops.

10.5.7. Connection to the main sewer line shall be provided by DHA on completion of the house/building and the member will not tamper with the main sewer line. Defaulters will be charged as per DHA policy issued from time to time.

10.5.8. Where a resident/member excavates the basement as per his requirement and decides to have bathrooms/toilets, the sewerage disposal will be through mechanical pumps by the resident.

10.5.9. Sewerage will only be disposed of in the DHA sewerage system. Anyone found dumping sewage in rainwater drains will be subject to heavy fines/service disconnections

10.5.10. It is mandatory for all the members to ensure that base and wall of sewerage / other manholes inside the house/setbacks should be constructed with P.C.C concrete (1:2:4). In case of any damage to the adjacent constructed house due to poorly constructed / leakage/seepage from manholes/ septic tanks/ sewerage lines/ water supply lines/ underground water storage tanks including rainwater harvesting tanks, the member will be responsible and reinstate the damages into its original condition as per the requirement of DHA. In case of any conflict in identifying the leakage/seepage, the decision of DHA will be final and the member will have to take action as per the instruction of DHA.

10.6. Gas / Telephone / Electric

10.6.1. The services have been laid out by DHA in coordination with relevant service providers. Services can be obtained from respective departments/services providers in accordance with both DHA departmental and services provider regulations.

10.7. Damages.

10.7.1. Nobody is permitted to damage roads and services laid by DHA. In case of extension of services, if any damage is likely to be caused to the road, sewer line, rainwater line etc such work shall not be undertaken without prior approval of DHA. In case of damages, a penalty will be imposed as per DHA policy (**Chapter XV**) and the cost of repair work will be recovered from the member.

10.8. Digging

10.8.1. No excavation shall be made in any street for utility. Nobody shall be permitted to dig or cut the road space including shoulders/berms without prior written permission from the Authority. In case of violation, a penalty will be imposed as per DHA policy (**Chapter XV**) as well as make good any damages so caused.

10.9. Infrastructure Development

10.9.1. Project Director is responsible for all construction related to infrastructure development and services deployment in the respective area of DHA.

10.10. Contractor Working with Project Directors

10.10.1. All violations of DHA Byelaws and fines thereof related to contractors employed with the Project Director Office will be dealt with by the respective Project Director.

10.11. Complaints / Maintenance Office

10.11.1. All complaints being received at the complaint office will be managed by the staff of the respective Project Director employed for complaint management.

10.12. Service Connection & Disconnection

10.12.1. All services connection will be facilitated by Project Director Office. Water connection and disconnection based on violations will be managed by Project Director's Office.

10.13. Resolution of Seepage Issues

10.13.1. The DHA services team will visit upon receipt of a complaint about seepage/leakage to ascertain the source/cause and will rectify it in case of seepage from the DHA services. However, In case of leakage/seepage from an internal source i.e internal sewerage/water supply line of a house/plaza, Byelaws Enforcement Team (Building Control) will send the requisite no of notices to the member responsible for necessary rectification of seepage/leakage issue. In case of no response/failure, DHA shall impose fines (as per policy) and/or disconnection of services till rectification of the issue.

11. CHAPTER-XI**HORTICULTURE AND PARKS DIRECTORATE****11.1. Horticulture**

- 11.1.1. If a tree is hindering the elevation of a house or is disturbing the boundary wall / or requires maintenance of a service line etc. will be removed after formal approval by the competent authority on the application forwarded by the resident to Horticulture Section, Administration Directorate.
- 11.1.2. If any violation occurs i.e. a tree is removed by residents without due permission a penalty will be imposed as per DHA policy (**Chapter XV**) in addition to the cost of the tree at the time of cutting /damaging and charges for the planting of 2 x trees in its place will be borne by the defaulter.
- 11.1.3. Residents are not allowed to plant a tree in offset or any space inside / outside of their house premises which can damage neighbouring walls/house or cause inconvenience.
- 11.1.4. Maintenance of the Lawn outside the house (Service area between the footpath and boundary wall) is the responsibility of the resident. They may plant ornamental plants but not trees hindering movement on the footpath. Already planted trees cannot be removed or cut without permission of the DHA competent authority. Likewise, the scheme of the plantation at median and green will not be disturbed/added without the permission of Horticulture Section DHA. A penalty will be imposed as per DHA policy (**Chapter XV**).
- 11.1.5. During maintenance/plantation by the Horticulture Section residents are forbidden to up stick any plant or ground cover without permission from DHA Authorities.
- 11.1.6. Trees that cause a disturbance, allergies and environmental hazards are forbidden and residents will not be allowed to plant e.g. Paper Mulberry, Conocarpus, Eucalyptus or any other plant as decided by competent authority DHA.
- 11.1.7. Unauthorized cutting/damage of trees/plants and ground covers will be dealt with under Horticulture Policy DHA.

11.2. Environmental Pollution

- 11.2.1. Burning of plastic materials in DHA premises is prohibited.
- 11.2.2. All commercial shops/garbage collections will use biodegradable shoppers/paper bags instead of polythene bags.
- 11.2.3. Burning of material in the DHA vicinity causing smoke/pollution is prohibited.
- 11.2.4. Violations against the above-mentioned laws a penalty will be imposed as per DHA policy (**Chapter XV**).

11.3. Debris Collection

- 11.3.1. Town planning & Building Control Directorate shall charge each house 70% of the rates in the table below during the processing of drawings as the exact volume of debris cannot be assessed before the construction of the house.

11.3.2. At the time of completion of the house, the Horticulture and Parks Directorate on receipt of the Completion Certificate file carry out a final assessment of the volume of debris on-site and send a final estimate of the remaining amount to be paid by the resident.

11.3.3. The Completion Certificate is handed over after payment of the balance amount by the resident.

11.3.4. Horticulture and Parks Directorate will lift the debris from all houses after forwarding the completion file.

11.4. Debris Collection Charges

Cat	Trolley 3000) (Rs	Amount (Rs)	Excavator Time(Rs 4000 Per hr)	Amount (Rs)	G. Total
Residential					
4 Kanal	30	90,000	6 hrs	24,000	114,000

12.4. Verification of Contractors

12.4.1. Construction work will only be undertaken through a contractor who and his team is verified by DHA Security Directorate.

12.4.2. If the member wants to construct his house/building without a contractor should get permission for self-construction from Security Directorate under the following conditions: -

12.4.3. No contractor is to be hired at any stage. However, if employed it will be done with the prior permission of the Security Directorate (after formal registration with the Town planning & Building Control Directorate)

12.4.4. Member will be responsible for the discipline of all labours working at the site.

12.4.5. Member will ensure that the labour employed does not indulge in any kind of undesirable activity.

12.4.6. No under 18-year age labour will be employed.

12.4.7. No labour will stay at night in the under-construction house.

12.4.8. Only 1 or 2 chowkidars will be employed for the safe custody of the under-construction house/material

12.5. Security Pass

12.5.1. Security Pass is mandatory for entry/movement/stay of domestic employees and other workers within DHA. It is obligatory for members/tenants to register their employees/workers with Phase Security Office and obtain security passes.

12.5.2. Members/tenants remain responsible for the conduct of their employees/workers. Any employee found without a security pass or involved in undesirable activities will be immediately expelled and blacklisted by security staff.

12.6. Road Safety

12.6.1. Adherence to traffic rules is obligatory for all members/tenants/workers/commuters. The following violations will be specially checked and a penalty/fine will be imposed:-

12.6.2. Underage driving.

12.6.3. Violation of speed limit observed by a speed camera.

12.6.4. One-way violation or driving on the wrong side.

12.6.5. Racing, drifting, skidding, one-wheeling and other driving acrobatics.

12.6.6. Driving without a silencer or with a noisy silencer.

12.6.7. Driving without a valid driving license.

12.6.8. Driving a Motorcycle without a helmet

12.7. Security Post / Guard.

12.7.1. Security Post within the plot line upto a maximum of 5 ft x 5 ft will be allowed after approval from the Competent Authority. No post or posting of a Security Guard outside the plot line will be allowed.

12.8. Vehicle Stickers / E-Tag

12.8.1. All the members/tenants residing in DHA should obtain a vehicle sticker / E-Tag from the Security Office of the respective phase.

12.9. Fire Works / Discharge of Arms/ Aerial Firing

12.9.1. To guard against any untoward incident, the display of fireworks (Aatish Bazi) and the discharge/testing of arms / Aerial Firing are prohibited within DHA.

12.10. Hazardous Materials / Chemicals

12.10.1. Storage of any kind of hazardous materials/chemicals in residential/commercial buildings is strictly prohibited.

12.11. Utilization of Vacant Plots

12.11.1. Use of vacant plots / open areas for playing or organizing any function/gatherings except funeral gatherings are prohibited.

12.12. Playing Outdoor Games

12.12.1. Playing outdoor games is only allowed in designated playgrounds. Playing on roads / in family parks / green areas is prohibited.

12.13. Unauthorized Parking

12.13.1. Parking of vehicles/motorcycles in areas other than designated parking places is not allowed.

12.13.2. Parking in front of others' house (s) must be avoided.

12.14. Cars Washing

12.14.1. Car washing neither on the car porch nor outside the house premises is allowed. Service stations in DHA are also not allowed to wash cars outside station premises.

12.15. Cooperation with Security Staff

12.15.1. All residents/employees are expected to cooperate with security staff and adhere to the instructions/guidelines issued from time to time.

12.16. Additional Aspects for Fine

Ser	Aspect	Fine

**IRREVOCABLE UNDERTAKING FOR RESIDENTIAL
BUILDING CONSTRUCTION IN DHA QUETTA**

Undertaking

(On Stamp Paper Worth Rs.500/- Duly Signed By Oath Commissioner)

I, the undersigned, _____, S/O, D/O, W/O _____
holding CNIC No. _____, Contact No. _____ R/O _____,
_____ do hereby solemnly affirm and declare as under: -

1. The undersigned is the sole and lawful owner of Plot no. _____, located in Sector, _____, Phase _____, measuring _____, situated in DHA
2. The undersigned has read and understood the Construction Byelaws of the DHA, and as such, shall, at all times, abide by, adhere to and comply with the same.
3. The undersigned has also received a copy of instructions regarding major Construction Violations.
4. The undersigned shall carry out construction of house strictly in accordance with the approved drawings/design. In case any addition or alteration is required in the approved drawings/designs, the undersigned shall submit revised drawing, per internal rules, policies, regulations and bye law of DHA .
5. The undersigned waives off his/her rights to raise any claims with regards to privacy, in respect of planning, development or construction in the adjoining areas, in case the undersigned, wilfully constructs windows towards the rear side of the house.
6. The undersigned shall not, at any time whatsoever, undertake any construction or installation of steel staircase in mandatory clear spaces.
7. The undersigned shall ensure that all material, equipment, machinery and debris concerning the construction at the Plot, is proper and orderly stacked, and does not create any hindrance and encumbrance in the adjoining areas. DHA, and as such, shall, at all times, abide by, adhere to and comply with the same.
8. The undersigned shall, prior to commencing construction, install, erect and affix green curtain cloth all along the respective construction site on the Plot.
9. The undersigned shall, at its own cost and expense, ensure safety against falling of construction materials in the adjoining areas.
10. The undersigned shall fix CGI sheets in front of the respective construction site, per DHA Quetta (hereinafter the "Plot") & DHA, and as such, shall, at all times, abide by, adhere to and comply with the same guidelines.
11. The undersigned shall ensure necessary safety, security and protection of all labour and machinery employed for execution of work at the Plot.
12. **CONSTRUCTION OF BOUNDARY WALL:**
 - a. The undersigned shall construct RCC boundary walls or RCC Columns on boundary walls at every regular intervals, at a distance of 10 feet of the Plot, if plot depth is more than 5 feet from crown of road.
 - b. The undersigned shall construct and erect a boundary wall up to plinth level, prior to commencing construction of the main building area.

- 13. INSPECTIONS DURING CONSTRUCTION:** The undersigned shall inform and provide the required information to the concerned staff of Town planning & Building Control Directorate, in respect of works undertaken at the Plot. In addition thereto, the undersigned shall regularly update DHA Quetta with regards to the following, along with execution and signature of sheet in token thereof:
- a. Layout of foundation before excavation.
 - b. On completion of boundary wall up to plinth level.
 - c. On attaining the roof height of basement, ground floor, first floor and mummy before casting of slab.
 - d. Construction of ground floor at DPC level.
 - e. On raising of 1st floor structure 1 foot above floor.
 - f. On completion of septic tank prior to putting the cover.
 - g. On making the ramp according to the approved plan.
 - h. On performance of necessary tests on water supply & sewerage lines.
- 14. USE OF ROAD:**
- a. The undersigned shall, under no circumstance, undertake any action or inaction that may cause destruction or damage to the adjoining road for any purpose, without prior written permission and approval of from DHA, and as such, shall, at all times, abide by, adhere to and comply with the same.
 - b. The undersigned shall not use berms of road for placing, disposing, or otherwise dumping any equipment, machinery, material, or debris, including, inter alia, mortar, concrete, cutting steel bars, or any other construction related material, outside the demarcated boundary of the Plot.
- 15. EXCAVATED SOIL:** The undersigned shall not place, dispose of or otherwise dump the excavated soil outside the boundary wall of the Plot, higher than berm level and the undersigned shall not erect any fencing, hedging, or thick vegetation in road space.

16. WATER SUPPLY ARRANGEMENTS DURING CONSTRUCTION OF PROJECT

- a. The undersigned shall apply to DHA, and as such, shall, at all times, abide by, adhere to and comply with the same, water connection, during construction of the house.
- b. The undersigned shall not install, erect, or operate any pump on the water connection, or in other open space on the Plot, or in any area adjoining the Plot.
- c. The undersigned shall not obtain water from adjoining house for construction purpose, in case the undersigned fails to comply with the same DHA, and as such, shall, at all times, abide by, adhere to and comply with the same. may take any appropriate action it may deem fit, in accordance with its internal rules, regulations, policies, and Byelaws of DHA, including inter alia, imposition of penalties, fines, violation charges, sealing of pump, suspension of water connection, and/or removal of pump.
- d. The undersigned shall seek prior written approval of DHA, for the restoration of the water connection after rectification/ settlement of construction violation.
- e. The undersigned shall, upon completion of construction at the Plot, apply for water and sewerage connections, subject to payment of requisite fee and written intimation of inspection to DHA.

17. OCCUPATION OF HOUSE/BUILDING: The undersigned shall not occupy and reside on the Plot or the house constructed thereupon, nor place any household furniture item or establish any kind of kitchen, prior to installation of water and sewerage connections. A failure in this regard, shall make the undersigned liable to imposition of penalties, fines, and charges, in accordance with the internal rules, regulations, policies, and Byelaws of DHA.

18. TEMPORARY LAVATORY/ BATHROOM

- a. The undersigned shall construct the septic tank, per approved drawing and design, prior to commencing construction of house/ building and shall also provide a temporary lavatory linked with septic tank for labours.
- b. The undersigned shall obtain prior written approval and permission from DHA prior to constructing and installing a temporary sewer connection for this temporary lavatory.
- c. The undersigned shall demolish the temporary lavatory, immediately, upon completion of construction and development of the house.
- d. The undersigned hereby also undertake that if above requirements (15a 15b and 15c) are not fulfilled, DHA Quetta shall have the right to disconnect and suspend the sewerage connection, till such time that the undersigned remedy and rectifies the same.

19. IN CASE OF CONSTRUCTION OF BASEMENT

- a. The undersigned shall observe in true letter and spirit all the instructions and precautionary measures listed below during the excavation and construction of the basement with a view to avert any damage to the life and property of all the adjoining houses / buildings.
- b. The undersigned shall employ a qualified and experienced Engineer to supervise the work and to ensure that all work is carried out and undertaken in accordance with the modern engineering practices, standards, specifications and rules.
- c. The excavation for the basement shall not be carried out during rainy spells / season.

- d. All works on basement shall be completed without any unreasonable delay
- e. Under no circumstances the work shall be left incomplete or abandoned after the excavation of the basement has commenced.
- f. Proper dewatering arrangements shall be made available throughout the construction of basement.
- g. The undersigned shall construct at least 9 inches thick RCC walls, with proper arrangement of water proofing of the basement.
- h. The undersigned shall construct water catchment drain around the basement and will arrange its disposal through collection chamber.
- i. The undersigned shall construct soakage pit or soakage well for disposal of sewage or surface water using mechanical system.
- j. The undersigned shall not use mechanical excavation machinery (Excavator, FE Loader or Tractor etc.) for excavation of basement without prior permission from DHA Town planning & Building Control Directorate.
- k. The undersigned also affirms, declares and undertakes that in spite of all the above mentioned precautions the undersigned shall be responsible for any damage to the property of the adjoining house / building and the persons dwelling, which may arise out of or in relation to any excavation or construction works of the said basement and that the undersigned shall make good any such damage or loss through the mode agreed and to the entire satisfaction of the parties involved and DHA and keep DHA harmlessly indemnified for all issues arising from it.

20. INCASE OF CONSTRUCTION OF SWIMMING POOL:

- a. The undersigned has duly submitted a draft drawing for approval which includes a Swimming Pool.
- b. The undersigned shall not raise any complain against DHA, in respect of any privacy issues and the undersigned will resolve in accordance with the Byelaws of DHA.
- c. The undersigned shall ensure the water tightness of swimming pool. If any complaint is received from the neighbours, regarding any seepage or leakage affecting the adjoining property, I will be held responsible and DHA may take appropriate action and undertake any such repairs at the risk, cost and expense of the undersigned.
- d. The undersigned shall pay water charges for swimming pool along with water and sewerage bill per the internal rules, regulations, policies and Byelaws of DHA, irrespective of whether the swimming pool is in use or not.

e. The undersigned shall abide by, adhere to and comply with all internal rules, regulations, policies and Byelaws of DHA, as may be amended and enforceable from time to time.

21. SECURITY CAMERA:

- a. The undersigned shall install security cameras in the house/plaza with recording back up, of approximately days.
- b. Cameras shall be installed in a manner that the privacy of any neighbour is not adversely affected.

22. FIRE PROTECTION SYSTEM: the undersigned shall install Fire Protection and Alarm system, per approved drawings, including, inter alia, smoke/ heat detectors, fire alarm sounders, manual call points, fire alarm control panel, fire extinguisher, fire blankets, first aid boxes and any other equipment approved in the fire protection drawing of my house/ building and will keep it operational on permanent basis, otherwise the undersigned shall be liable to pay violation fine as decided by the DHA Quetta.

23. That I have carefully read and fully understood the contents of this undertaking prior to the signing and execution, and as such, the undersigned shall, at all times, abide by, adhere to and comply with the internal rules, regulations, policies, and Byelaws of DHA, as may be amend, revised or modified and enforceable from time to time. policy

Note:

1. 1. The undersigned hereby, also, expressly agrees and acknowledges that any oversight, or delay, in the inspection and scrutiny by DHA Quetta, shall not absolve the undersigned in respect of the liabilities arising out or in relation to the violation of applicable law, therein made rules and regulations, as well as the internal policies and Byelaws of DHA .
2. 2. The undersigned hereby acknowledges that in case of repeated disregard, non-compliance, breach, contravention, infringe of the Byelaws, or any part thereof, DHA shall have the right to disconnect and suspend the utilities supply, including, inter alia, water. However, if the disregard, non-compliance, breach, contravention, infringe of the Byelaws, or any part thereof is in the form of construction, installation or erection of any superstructure, DHA shall have the right to demolish the same.
3. 3. I, the undersigned do hereby solemnly declare, affirm, and undertake, on oath, to abide by, comply with, and adhere to the provisions contained herein, and the duties and obligations arising therefrom, and as such, in case of non-compliance, disregard, contravention, infringement, non- observance, or breach of the same, Defence Housing Authority Quetta shall have the right to impose and levy, such penalty, financial or otherwise, as it may deem fit, till such time that the same is remedied and rectified.”
4. Same as on other undertaking executed by the undersigned in favour of DHA.

**NOC FOR BASEMENT UNDERTAKING****(On E-Stamp Paper Worth Rs.100/-)**

I, the undersigned, _____, S/O, D/O, W/O _____, holding CNIC _____, Resident of _____, am the sole legal owner of Plot No. _____, located in Sector, _____, Phase _____ DHA Quetta (hereinafter the "Plot") & DHA, despite all reasonable efforts have failed to obtain NOC for construction of basement, in my proposed building, from the owners of adjoining building no. _____. As a result thereof, the undersigned that permission in this regard may please be granted for construction of basement without NOC. For this purpose, the undersigned hereby declare, confirm, affirm and undertake as follows:

- a. In case the construction works undertaken at the Plot, results in any damage or loss to the adjoining areas or buildings, the undersigned shall solely take full responsibility of the same, and indemnify DHA from the same. As such, neither DHA nor its staff shall be held responsible for such damage or loss. Importantly, all cost and expense with regards to the repair, remedy and rectification resulting from the respective loss or damage shall solely be borne by the undersigned, to the entire satisfaction of the affected legal owners.
 - b. The undersigned hereby indemnifies, defend, and hold harmless, DHA and its directors, officers, affiliates and employees, from and against all third-party claims, actions, suits, demands, damages, obligations, losses, settlement, judgments, costs and expenses, which arise out of, relate to or result from any act or omission, breach of this Agreement, willful misconduct, fraud, act of negligence, on behalf of the undersigned.
 - c. Any litigation with the owner / owners of the adjoining buildings in this regard shall be faced entirely by the undersigned. As such, the undersigned shall indemnify DHA in this respect, and expressly agrees and undertakes to not involve DHA or its staff, directly or indirectly, with regards to any claim, inter se, the undersigned and the owners of the adjoining areas. Additionally, all costs and expenses in this regard shall be borne by the undersigned.
 - d. The undersigned shall be fully responsible for loss of any life / person's dwelling therein due to construction of basement and / or damage to the adjoining building.
2. I have carefully read and fully understood the contents of the undertaking.
